

The Washington Materials Management & Financing Authority is required to file an annual report with the Washington State Department of Ecology. This workbook contains data and information requested in order to meet compliance with WAC 173-900-800 and additional information required via passage of SHB 1498 in April of 2013. The workbook is designed to provide data and information in the format listed in the index outlined below, as specified in WAC 173-900-800 and as amended with the passage of SHB 1498.

***NOTE:** All figures and data in this report are estimates based on actual source documents including processor invoices with actual weights and charges, collector bills of lading showing estimated weights - converted to actual weights after verification through processor and transporter receipts, based on materials collected in 2020 (some collected in 2020 and processed in 2021) and other information received from collectors and processors including "collector logs" which include source and volume estimates by entity type.

1. Total weight (in pounds) of covered electronic products (CEPs), including orphans, for the 2020 program year including documentation verifying collection and processing for:
 - a. CEP pounds collected, by type, by county
 - b. CEP recycled pounds, un-recycled residuals, and reused - by ALL program Direct Processors
 - c. Standard Plan CEP materials disposition - mass balance report
 - d. Pounds collected and processed verification - based on paid processor invoices for covered materials
2. Total weight of CEPs received from each nonprofit charitable organization primarily engaged in the business of reuse and resale used by the Standard Plan.
3. Total weight estimates of CEPs received in large quantities from small businesses, small governments, charities and school districts.
4. A list of collection services provided in each county and each city with a population of greater than 10,000 and the parties who operated them.
5. Processor information:
 - a. A list of all direct processors used; **(see section 1b.)**.
 - b. The weight of CEPs processed by each direct processor; **(see section 1b.)**.
 - c.d. A description of the processes and methods used by each direct processor to recycle the CEPs including a description of the processing and facility locations by final destination country. A compliance audit report meeting the requirements in WAC 173-900-365 for each direct processor listed in the Standard Plan.
(Note: Links to these audit reports posted on the Ecology web site are used to meet this requirement)

6. A list of subcontractors (initial downstream vendors) used by each direct processor including the facility addresses.
7. A brief description of the educational and promotional efforts that were undertaken to inform covered entities about where and how to reuse and recycle their CEPs.
8. Total weight of unwanted electronic products, electronic components, and electronics scrap that have been exported from Washington state to countries that are not members of the Organization for Economic Cooperation and Development or the European Union.
9. A list of manufacturers that are participating in the Standard Plan.
10. Documentation of work done with direct processors used by the Standard Plan to promote and encourage the design of electronic products that are less toxic and contain components that are more recyclable. Includes data on historical collected weights and units.
11. Any information available regarding the reuse of CEPs through the E-Cycle Washington program.
12. Processor Closure Plans and Financial Responsibility.
13. Program revenue and cost.
14. Signature of the Authority.
15. Supplemental information - WMMFA volume allocation excerpt from Standard Plan.

2020:

In early 2020, prior to the announcement of the widespread Covid pandemic and the associated social restrictions the WMMFA had contracted for an ambitious outreach advertising campaign with Entercom and Outfront Media. The campaign consisted of a combination of radio, television and OTT (over the top) media. The Radio content consisted of a mix of previously recorded 15 and 30 second spots suggesting the public recycle instead of disposing of covered electronic products. All media used directed the public to "find a location" web site hosted by Ecology. A summary of the various media types and impressions of each is provided below. Unfortunately the covid pandemic interfered with our messaging leaving potential results of the 3 month campaign uncertain as many sites, especially in March and April of 2020 were closed so the impact of the outreach could not be fairly evaluated. The WMMFA also placed many billboards at mostly rural locations, as identified below, in early 2020.

Additional early 2020 outreach efforts continued in a similar manner to several prior years to ensure that information about where, how, and why to recycle CEP's was available to all state residents - especially smaller counties identified as having lower collection per capita than the state wide average. Specifically:

Billboards placed:

- Longview , Oregon Way/Industrial Way and Hwy 4 / 46th Ave. W - 8 weeks - April through May
- Wenatchee, WA Wenatchee Ave / Ferry St. and SE 9th S - 8 weeks - February through March
- Tri Cities, WA 4 locations various metro - 5 each at 5 weeks each - February through March

Materials of Concern Export information - 2020

The preferred environmental standards, that all processors contracted with the WMMFA must subscribe to, require that any materials of concern (materials that present potential risk to humans or the environment) exported to a NON-OECD (Organization for Economic Co-operation and Development) member country have approval from the destination country and confirmation from the US Environmental Protection Agency.

Total weight of all materials of concern, including unwanted electronic products, electronic components, and electronics scrap collected by the WMMFA that have been exported from Washington state for plan year 2020, from processors used by the WMMFA, to countries that are not members of the Organization for Economic Co-operation and Development or the European Union = 0. This information is provided to the WMMFA by each processor. Destination countries for "materials of concern", and non- materials of concern, where provided by processor, (commodities) can be found in section 5.c.d. of this report

Documentation of work done with direct processors used by the Standard Plan to promote and encourage the design for recycling of new products (CEP's) destined for end of life recycling under this program - 2020

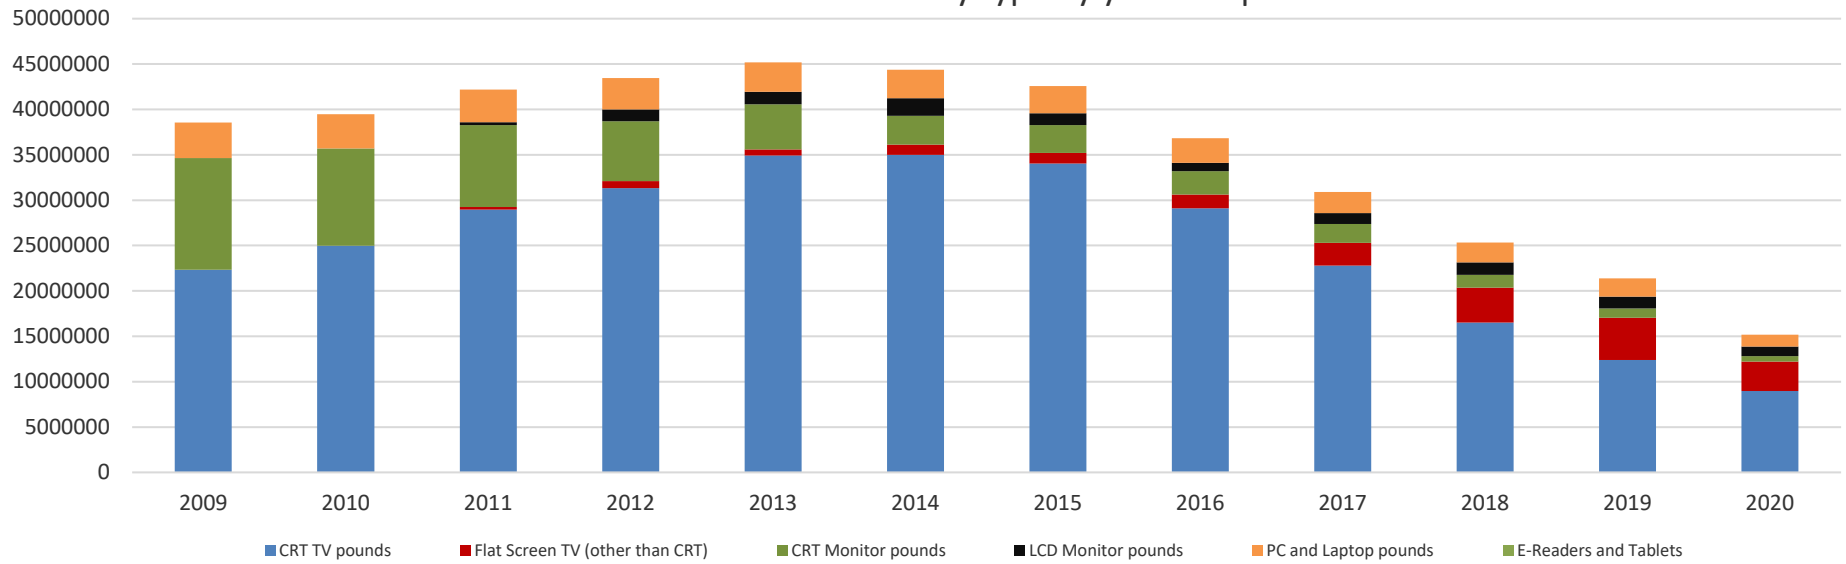

Approximately seven years ago we reported that 85% (by weight) of the electronic products collected by the WMMFA (specifically CRT TV's and CRT Monitors) were no longer being manufactured for sale in the US. Because E-Cycle Washington is entering its 13th year of operations the mix of collected covered devices is changing rapidly. The charts provided below illustrate the fact that WMMFA collected product "mix" is more closely aligned with products manufactured *since* program inception. Specifically, 230,000 units of flat screen devices were collected in 2020 compared to only 128,000 units of CRT product. However, CRT devices by weight are twice that of Flat screen devices in total (9.5 mlbs. CRT to 4.3 mlbs flat screen). It is encouraging that newer covered devices, TV and monitor in particular, weigh 1/3 to 1/2 less than comparably sized obsolete CRT models. Our member manufacturers have been successful in reducing the weights and longevity of covered electronic products significantly. Another marker of continued progress of DfR is reflected by the increase of LED Televisions that contain no mercury. In 2020 the WMMFA processed approximately 130,000 pounds of LED Televisions. In order to facilitate collaboration and communications between our processors and our member manufacturers the WMMFA invited two E-Cycle WA approved processors to participate in an in person board discussion to address CEP design and barriers to increasing the recovery of recyclable or reusable components within products they are currently receiving. Due to the covid pandemic this meeting was conducted via conference call instead of the planned "in person" contact.

Summary of Design for Recycling - October 1, 2020 WMMFA Board Meeting: Sam Kim, President of E-Waste LLC and Bill Sidell, Operations Manager, ACE Metal Co. initiated the DfR discussion suggesting to the manufacturers that by making their products easier to dismantle processors might achieve a higher recycling rate. Specific suggestions and discussion focused on the numbers of screws, and uniformity in screw head sizes utilized, glue, and , glue type used. Sam and Bill suggested that manufacturers might provided processors with dismantling instructions including information on types of chemicals or solvents that might help separate glues (if any). Another suggestion was to identify by stamp or code what type of plastic was being used for each sub component so that the components could be separated more accurately and quickly. Both Sam and Bill expressed concern over the future of plastics recycling as many countries were considering used plastic bans, via current or proposed legislation or trade agreements.

WMMFA Processors Summary of responses – September 2018

The WMMFA is interested in collaborating with, and coordinating communications among, contracted processors and member manufacturers of the Authority's recycling plan in reference to CEP (covered electronic products) design. The goal of our DfR process will be to increase the potential for higher volumes of reuse materials and **more efficient handling and disposition of end of life materials gleaned from the recycling process**. WMMFA member manufacturers would like to get feedback from processors, such as yourself, as to what could be done to make their products easier to recycle at end of life with less waste.

Please help by completing the survey questions below and return the completed form to the WMMFA by Friday, October 19th. Your responses to the survey and participation in this project are voluntary. Suggestions gleaned from survey responses will be shared anonymously with the WMMFA board of directors and member manufacturers of the WMMFA. Specific responses by processor or manufacturer are confidential.

1. What are the top 3 barriers to improved processing production efficiency in processing CEP's? (TV, Monitor, PC, Laptop, tablets, readers) Include constraints identified by downstream vendors, if known. (use extra page if necessary). **Information on LCD, LED and flat screen technology specifically** (CRT products are no longer being manufactured)

1. The usage of too much glue specially on LED TV's and or in LCD and LED Monitors and high labor costs to dismantle without shredder.
2. The usage of many different kind of screws. Standardizing the type or kind screws used, it might help the processing speed and efficiency. If one kind of screw is used on each product it would save much labor cost. Example: Phillip's #2 for PC's, Torx for TV's, and Hex for Monitors. The plastic used for cases of flat screens of lesser value and difficult to find positive downstream recycling value – if any.
3. Properly identify plastic type. Example: most older units have their plastic type recycle sign on them, but newer electronics rarely have their recycle type. Residuals after dismantle of flat screens have little or no value (mostly labor expense)

2. Which Top 3 "materials of concern" currently used within CEP's, if revised or eliminated would have the most positive impact on your direct or downstream costs?

Tablets, E-Readers & Portable DVD Players are small and lightweight. There is little opportunity to re-coop the labor to dismantle with rates comparable to other per pound items.

3. The manufacturers are interested in lowering your processing cost of CEP's. From your standpoint what would need

to be done to allow this to happen? Please include any components of the current logistics/handling operations or CEP assembly details - as well as other processing operations that would impact your costs – positively. (use separate page if necessary)

- Standardizing the screws used on all electronics, if not, as many as possible.
- Usage of only 1 kind of screws on any particular electronic, or if there is a need for multiple screws on a component, try to use same kind but no more than 2 screws that are different in size.
- Reduce or remove the glue on electronics and use either clips or screws.
- Pre-sort by collectors into various packaging units by technology. LCD separate from LED separated from CR, etc.

4. Would your organization be interested in participating in quarterly conference calls with representatives of other processors and leading manufacturers to discuss practical design revisions and other joint efforts that could result in better DfR, the outcome of which would be to reduce the amount of environmentally sensitive parts within CEPs and reduced cost for manufacturers and processors?

Re-use information -2020

Based on phone interviews and informal surveys of collectors that typically refurbish or re-sell used electronics the ratio of reused to recycled products varies considerably by type of collector, and, type of product. Approximately 20-25% of the computer and flat screen products are given a cursory review for candidacy for either repair or re-sale. Of that 20-25% only "high end" products (25% of the 20-25%) are given attention or consideration for repair or re-sale. The remaining 75% of these "eligible" products, based on initial inspection, will be plugged in and if they work will go directly to re-sale. These percentages are an "average" as some collection facilities that specialize in computer refurbishment may have higher repair rates than many non-profit collectors that accept covered devices and may only do a plug in test to see if the device performs well enough to re-sell. The larger screen TV's (greater than 30") sell well. However, due to the low sales value of refurbished equipment in relation to the sales price of new equipment available at main stream or on-line retailers much less time than in prior years is spent on refurbishment / repair. Unlike prior years the non-profit collectors are not generally testing and repairing any of these devices, except for ones that are of high value and/or in pristine condition. The E-Cycle Washington program was designed primarily as an end of life program for unwanted electronics and most of our collectors, based on their core business, focus on getting CEP's to the program for responsible recycling of contents. For 2020 we estimate that a weight equivalent to approximately 80,176 pounds of COMPUTERS (3920 units of laptops and towers combined) were put into reuse by our collectors. This estimate is based upon an approximate 6.1% re-use estimate across all of our collectors on the 8.7% (by weight) of all desktop or laptop product collected. We estimate a negligible amount (nil%) of CRT TELEVISIONS were put to reuse. Of FLAT PANEL TELEVISIONS (plasma, LCD, and LED) we estimate that approximately 4.6% by weight (149,450 pounds / 6220 units) went to reuse. FLAT PANEL MONITORS of 35,307 pounds, or 3,230 units were sent to reuse by collectors. CRT MONITOR reuse was negligible (0%). These pounds are NOT included in our collected pounds reports as they are sent to re-use directly by the collectors and therefore not transported or processed within the E-cycle program. None of the WMMFA's direct processors engaged in re-use or refurbishment of end of life products for pounds collected in 2020. Therefore, 100% of reuse and/or refurbishment for resale/reuse was done at the collector level.

NOTE: The Authority has no formal data collection means to obtain re-use volumes from our collectors. In fact, many of them compete for collections from the donating public. For this reason we report with reasonable accuracy, the re-use pounds by product type from our PROCESSING network and we make broad estimates about re-use data at the COLLECTOR level based on the types of products they collect and informal conversations with collectors as to the volume of products being sent to re-use.

The Preferred Processing Standard requires processors for the WMMFA have adequate closure plans and a sufficient financial instrument that assures against abandonment of any CEP's, components, parts, materials or residuals. This section contains a summary of the Financial Closure Plan of each of the WMMFA's contracted processors.

***Expanded Detail: E-Cycle Washington as managed by the WMMFA promotes Re-use and Recycling as a priority as evidenced by all Processors commitment to the "preferred" processing standards**

Environmental				
	Are there any red flags in audit - how important are they ?			
	What is current inventory of materials requiring processing, and is it low or high in comparison to others ?			
	Does processor have reasonable assurance from downstream vendors as to ultimate disposition? Audits?			
	What is the perceived RISK to the WMMFA of using processor? Are they in good standing in their communities?			
	Considerations: Insurance, Litigation, Capital, Capacity, Expertise, Experience			
Competitive Rates				
	Rates by commodity make sense in comparison to freely bid rates by others, or suggested rates based on market conditions ?			
	Does processor transport in their proximity that would allow lower overall rate or better value ?			
	Has processor justified rates via quality of downstream vendors destinations ?			
Creativity				
	Does the processor use truck, ocean vessel, or train for lower environmental impact and expense ?			
	Does the processor use local vendors to save cost / environmental impact ?			
	Does the processor have multiple options in order to sustain plan compliance ?			
	Does the processor seem knowledgeable and have expertise in their field?			
	Are their quality differences, perceived or real, of processors - by collectors that result in collector "requests" to use a certain processor ?			
	Does the Processor have a "re-use" component to their business ?			
	How much of the total weight of materials provided the processor is landfilled ?			
	Does the processor engage in public collection events coordinated by them ?			
Capacity: Transporter & Processor				
	Does the processor require volume corrections (plus or minus) from the authority due to their own operational or staffing issues ?			
	Can the processor adjust to downturns and upturns given unpredictable collection volumes by region ?			
	Is the processor easy to work with?			
	Does the processor have enough dock doors and staff to accept multiple deliveries at the same time?			
	Does the processor ever turn away transporters for its own operational convenience?			
	Do collectors or other transporter vendors complain about processors service when receiving?			
	Will transports deliver to the processor for a reasonable rate? Do we incur detention charges?			
Proximity to collector				
	The higher density of collection sites without self transport = great transport opportunity for processors			
	Location of processor extremely important for both cost (length of transport) and environmental considerations			
	Does proximity of processor trump actual commodity prices via lower transport cost?			
	What is the weighted average processing cost by collector, by processor, and are other constraints (capacity, etc.) hit before this consideration?			
Auxiliary services: Transportation				
	Can the processor make small and large collector pick ups timely using the correct equipment (liftgate, box truck, semi)?			
	How far, in miles, will a self transporting collector transport his materials, and, at what cost, before the WMMFA moves to use a processor in closer proximity for their (collector) convenience?			
	Can the processor handle mistakes by collectors, transporters, the WMMFA or the public with a reasonable approach?			
	Is the transporter getting sufficient volume from the WMMFA to remain interested in hauling favorable, and unfavorable, transport lanes?			
Billing Accuracy Timeliness				
	Does the Processor communicate effectively if there are questions or problems?			
	Is the processor timely and accurate with invoices?			
	Is the processor "high maintenance" in terms of WMMFA staff time?			
	Does the processor provide feedback to the Authority when it encounters problems?			
	Does the processor provide enough detail on invoices to identify all relevant recyclable downstreams by commodity type?			
	Do processors invoiced weights match collectors estimated or actual weights where applicable?			
	Is the processor responsive with informational requests?			
Existing Infrastructure				
	Is the processor establishing operational plans that take business from an existing vendor with no value added?			
	Are there competing services to what the processor offers that are a better value given any duplication of effort?
