1 Executive Summary

The Washington State Mercury-Containing Lights Product Stewardship Program, called LightRecycle Washington (the “Program” or “LRW”) began on January 1, 2015 for the collection and recycling of mercury-containing lights sold at retail.

Washington State residents and businesses can recycle up to 10 mercury-containing lights per day for free, by dropping them off at authorized collection sites throughout the State. Collection sites are required in every county and every city of 10,000 or more people. LRW continues to meet this requirement through its established collection network of over 200 registered sites, and by holding collection events in areas where no permanent collection site exists. Collectors include retailers, municipal waste facilities and residential curbside collection.

Collected lights are transported to the Program processor (recycler) using ground transport, where they are recycled as Universal Waste. Recovered mercury is retorted then reused or stored, and is managed by the processor in compliance with applicable local, state, and federal laws. Recycling mercury-containing lights protects the environment and human health by reducing the release of mercury into the environment and by recovering recyclables such as metals and glass.

The total amount of mercury containing lamps collected in 2019 was 629,338 lbs., estimated to be 1,343,229 units. This volume represents approximately 92.8% of the annual collection target of 1,447,189 units, as committed to in the Program Plan Update submitted on January 1, 2017.

Advertising and promotion included print and digital ad campaigns. Collection sites and retailers were also sent printed marketing materials on request.

The Program is funded through an Environmental Handling Charge (EHC) added to the purchase price of each mercury-containing light sold at retail in or into Washington State. The current EHC is \$0.95 per unit for all program types. The Program is administered by PCA Product Stewardship (PCA), a 501(c)(3) non-profit organization. Greater details about the Program are contained in the report below.

2 Program Description

The Program has been developed pursuant to the provisions of Chapter 70.275 of the Revised Code of Washington ([Chapter 70.275 RCW](#)) “Mercury-containing lights-proper disposal” (the “Law”). This Plan complies with the requirements of the “Rule” prescribed in (Chapter 173-910 Washington Administrative Code ([Chapter 173-910 WAC](#))) where there is no conflict with the requirements of Chapter 70.275 RCW.

The Law requires that the Program be funded through an EHC added to the purchase price of each Mercury-containing light sold at retail in or into Washington State as of the program start date, January 1, 2015. The EHC was \$0.25 per unit for all program product types from the start of the program until June 30, 2017. On July 1, 2017, the EHC was increased to \$0.50 per unit for all program product types. On February 1, 2018, the EHC was increased to \$0.95 per unit for all program product types. Each change in EHC was approved by the Department of Ecology.

Every Producer of mercury-containing lights sold in or into Washington State for retail sale must participate in a product stewardship program for those products. Participation in LRW is open to all Producers.

A network of collection sites has been established throughout Washington State that includes retailers, municipal waste facilities, collection events, and residential curbside collection. Washington State residents and businesses can recycle up to 10 mercury-containing lights per day for free, by dropping them off at authorized collection sites throughout the State.

Collected lights are transported to the Program processor (recycler) using ground transport, where they are recycled as Universal Waste. Recovered mercury is retorted then reused or stored, and is managed by the processor in compliance with applicable local, state, and federal laws.

LRW is administered by PCA, a 501(c)(3) non-profit organization.

3 Participating Producers

PCA Product Stewardship Inc. (PCA) has been designated as the Stewardship Organization for LRW. PCA administers the Program on behalf of all participating producers who sell mercury-containing lamps in or into Washington State.

PCA is a not-for-profit product stewardship organization incorporated in Oregon and registered in Washington (UBI number 603 226 459).

The participating producers in LRW are listed in Appendix A, along with their contact information and the associated brands they sell.

The total number of mercury-containing lights sold at retail in or into the state by participating producers in 2019, as reported by Program producers and remitting retailers, is provided in Table 1 below, by product category.

Table 1: Mercury-lights Sold at Retail in WA in 2019

Product Category	2019 Units Sold
Compact Fluorescent Lamps (CFL)	559,229
Fluorescent Tubes (All lengths and Shapes)	1,032,332
High Intensity Discharge (HID)	42,079
Total	1,633,640

The total number of mercury-containing lights sold at retail in or into the state by participating producers in 2018 was 1,834,705, so the 2019 sales represent an 11% decline in sales. This decline is attributed mainly to the transition to other lighting technologies, such as Light Emitting Diodes (LEDs), especially prominent in the CFL category.

4 Program Goals

To estimate the number of Program Products to be collected from 2016 - 2020, PCA used the 2015 actual collection data (as reported in the 2015 LightRecycle Washington Annual Report), as a baseline. As outlined in the Program Plan Update dated January 1, 2017, PCA established a collection goal of increasing collection by 10% annually. Table 2 below outlines the revised collection targets from 2016 – 2020, and the 2019 target is 1,447,189 units.

Table 2: 2016 - 2020 Collection Targets

Revised Targets	2015 Actual	2016	2017	2018	2019	2020
Total units collected	988,449	1,087,294	1,196,024	1,315,626	1,447,189	1,591,908
Annual Increase		10%	10%	10%	10%	10%

The amount of materials collected at registered collection sites and received by the Program processor in 2019 was 629,338 lbs. This weight includes any non-program materials that may have entered the collection system, however does not include lamps from Puget Sound Energy (PSE), who continue to operate an independent network of collection sites for CFLs and incandescent lights.

Upon receipt at the processor, each shipment is weighed. Weights are recorded separately for fluorescent tubes and mixed lamps, which are comprised of CFLs, HIDs and curved fluorescent tubes. Mixed lamps are sampled to determine the split of Program materials for those types. Weights of individual lamps were used to derive the number of units collected.

The total amount of program materials collected in 2019 was estimated at 629,338 lbs, which converts to 1,343,229 units, representing approximately 92.8% of the annual collection target of 1,447,189 units. A breakdown of the materials collected in 2019 is provided in Table 3 and the graphic below:

Table 3: Program Materials Collected and Processed in 2019

Lamp Type	Weight Collected (lbs.)	Weight per Unit (lbs.) ¹	Units Collected
Fluorescent Tubes - 4' Straight	380,811	0.5	761,622
Fluorescent Tubes - 8' Straight	127,519	1	127,519
Fluorescent Tubes - Curved Shapes	18,526	0.25	74,102
CFLs (Compact Fluorescent Lamps)	93,499	0.25	373,997
HIDs (High Intensity Discharge)	8,983	1.5	5,988
Total	629,338		1,343,229
2019 Annual Target			1,447,189
Percentage of Goal			92.8%

¹ Conversion rates used as outlined in the 2017 Program Plan Update, as approved by the Department of Ecology.

Program Materials Collected and Processed in 2019

Documentation confirming collection and processing of program material is provided in Appendix B.

The Program tracks materials collected by region, as it was not operationally efficient or cost effective to track materials by collection site or by county. A breakdown of the estimated collections by region is provided in Table 4 below (the breakdown is estimated due to several sites that consolidate materials from multiple regions. The breakdown is based on weight, in pounds, collected).

Table 4: Estimated Collections by Region in 2019

Region	2019 Estimate
Coastal	4.3%
Northwest	7.2%
Island	4.0%
North Puget Sound	51.7%
South Puget Sound	11.2%
Southwest	10.4%
North Central	2.1%
South Central	1.5%
Northeast	5.5%
Southeast	2.2%

Estimated Materials Collected by Region

5 Collection System

Collection Sites

By law, collection sites are required in every county and every city of 10,000 or more people. LRW met this requirement by establishing a collection network of close to 200 registered sites that collected all program products, and held collection events in areas where no permanent collection site could be placed. In two counties and four cities of 10,000 or more people, collection events were scheduled in lieu of permanent collection sites. In one county and five cities of 10,000 or more people, awareness of collection sites in an adjacent city was raised.

At the end of 2019, LRW had a total of 289 registered collection sites, including:

- 196 sites that accept all program products
- 65 sites that accept CFLs only
- 28 additional sites that are unadvertised, that accept all program products

Only collection sites that are advertised and accept all program products meet the collection site requirements in the law. See Appendix C for a complete list of advertised collection sites by city and county.

Unadvertised sites include:

- Sites that accumulate lights but do not collect lights directly from residents or do not want to promote the collection of lights.
- Curbside collectors whose facilities are not suitable for public drop-off of lights for recycling.

Curbside Collectors

Two waste haulers that have curbside collection programs for mercury-containing lights are registered as LRW collectors. The names of the waste haulers and location of their corporate headquarters are:

- Recology/CleanScapes, Issaquah, WA
- Republic Services, Bellevue, WA

Collection Events

Collection events were held to meet collection requirements in areas where no permanent collection site could be established. However, the majority of collection events that were supported by LRW were not required but were completed to provide additional convenience and maximize collection.

- Mercury-containing lights were collected at events that were held around the state that were either initiated or supported by the Program.
 - LRW and local government events
 - 7 locations, 7 days
 - 1,586 lbs. collected
 - King County Wastemobile
 - 13 locations, 163 days
 - 33,458 lbs. collected

See Appendix D for a list of collection events held in 2019.

Total Mercury-containing Lights Processed

LRW collected 629,338 lbs. of mercury-containing lights, all of which were processed by EcoLights.

Description of Processing Methods

Fluorescent Tubes: Fluorescent tubes are fed into a machine utilizing a controlled environment where the tubes are mechanically crushed and separated into the following components:

- Glass cullet
- Aluminum end caps
- Mercury phosphor powder

The glass cullet is sent to a Washington aggregate company for use in the manufacture of concrete. The aluminum endcaps are sold in Washington as scrap metal, and the mercury phosphor powder is shipped to an EPA regulated and approved mercury retort company in Indiana, where the mercury is removed from the powder and made available for future use in new products or processes such as the manufacture of fluorescent lamps. The clean phosphor powder is shipped for recovery of rare earth elements contained in the powder.

CFLs: Compact Fluorescent Lamps are fed into a separate processing machine designed to separate the glass from the CFL base, and capture the mercury, in a controlled environment. The glass portion is then fed into our straight tube processing machine and the bases are sent to a Washington-based electronics recycling company.

HIDs: High Intensity Discharge lamps are dismantled by hand or by machine. The outer glass envelope is removed, crushed and sent with other lamp glass to an aggregate company for use in concrete, the metal frame is sent to metal recyclers, and the mercury bearing glass ampules are sent to the same mercury retort for recovery of the mercury for use in new products or processes.

Other: Other types of lamps (U-tubes, circular, neon tubes, etc.) are processed in EcoLights straight tube recycling equipment, with components separated in the same manner into commodities to allow for further recycling.

Environmental Health and Safety

EcoLights processing equipment is equipped with pleated filters, HEPA filters, and sulfur impregnated carbon beds to capture dust and mercury vapor before the process air is returned to the processing room. The lamp processing room is also equipped with additional ventilation equipment designed to capture fugitive mercury that operates 24 hours per day. The building is not vented to the outside environment.

All technicians working in the lamp processing room are equipped with full face respirators designed to capture mercury and protect the employees. They also are equipped with personal protective equipment, including coveralls, steel toed boots, gloves and hairnets to minimize exposure to fugitive mercury in the processing room. All technicians undergo urine testing at hire to establish a baseline and every 6 months to ensure safe levels are maintained.

Transportation

Transportation is completed by these two methods:

1. Direct Dispatch – Collection sites contact EcoLights directly and pick-ups are scheduled to be completed by EcoLights or their parent company, Total Reclaim, or a third-party hauler.
2. FedEx – Box kits are sent out and returned via Fed-ex.

Compliance Audit Report

EcoLights Northwest provides PCA with an annual Compliance Audit Report completed by a qualified third party, which satisfies all the requirements of WAC 173-910-430 (6). Due to the associated risks of the Covid-19 pandemic, the physical audit has been delayed until it can be conducted in a safe manner. As of December 31, 2018 EcoLights had not received any financial penalties, regulatory orders, or violations regarding the processing of lamps over the last three years. The compliance audit report will be added to the annual report once it can be completed by a qualified third party.

7 Education and Outreach

Advertising and Promotion Completed

Due to the uncertainty of the financial sustainability of the program, as noted previously, and with the support of Ecology, advertising and promotion were limited in 2019.

- Collection sites and retailers were sent printed marketing materials on request.
- Print ads were run in seven newspapers to raise awareness of collection events or local collection sites as needed
- Printed marketing materials
 - Information cards (5" x 8") were provided to retailers, local governments and others.
 - Collection site posters were provided upon request.
 - Printed marketing materials can be ordered by phone, email or through the website and are provided at no charge.

Examples of marketing materials and advertisements used by the Program in 2019 are provided in Appendix E.

Assessment of Effectiveness

Advertising was designed primarily to create awareness of the program, drive the audience to the website and specifically to the collection site finder. However, the effectiveness of LRW outreach efforts cannot be gauged solely by the amount of website traffic or materials collected. Other factors such as the cumulative impact of advertising and outreach efforts in previous years can impact collection volumes. The long lifespan of program products also means that program use does not necessarily immediately follow a gain in program awareness.

8 Financial Report

The Program is funded through an EHC added to the purchase price of each mercury-containing light sold at retail in or into Washington State.

A breakdown of the revenue generated by the Program in 2019, as well as expenses for Program operations, communications, and administration is provided in Table 5.

Table 5 Program Financial Summary for 2019

Description	2019 Total Actuals
Light Revenue	\$ 1,551,660
Retailer Offset	\$ (10,658)
Total Revenue	\$ 1,541,002
Program Expenses	\$ 917,702
Other Expenses	
Communication	\$ 26,079
Administration	\$ 156,949
Regulatory	\$ 93,010
Total Other Expenses	\$ 276,038
Total Expenses	\$ 1,193,740
Increase/(Decrease) in Net Assets	\$ 347,261
Net Assets, beginning of year	\$ 766,144
Net Assets, end of year	\$ 1,113,406

EVERYDAY LIVING	RITE-AID	Westpointe CFL
EYE	RUDD Lighting Direct	Woods
EYE Hortilux	RUUD	Zoo
Feit Electric	RUUD Lighting	
Finally	Safeway – Bright Green	

Appendix B: Collection and Processing Verification

The following letter from EcoLights confirms the amount of program materials collected and processed by LightRecycle Washington during 2019.

June 9, 2020

LightRecycle Washington Program
PCA Product Stewardship Inc.

RE: 2019 Processing Volume

Dear LightRecycle Washington:

This letter is to acknowledge that Ecolights Northwest, LLC picked up or received the following volume of used fluorescent lamps and other materials from collection sites under the LightRecycle Washington program during 2019:

- Total program material weight: 638,943 pounds

This volume includes some non-program materials, such as incandescent lamps in program containers.

Additional back-up documentation of these volumes is available.

We look forward to continuing to provide innovative lamp recycling services to PCA Product Stewardship Inc. and the residents and small businesses of Washington during the coming year.

If you have any questions, please contact me at 206-343-1247.

Sincerely,

Craig Lorch
Manager
EcoLights Northwest, LLC

Appendix E: Advertising and Promotional Materials

The following images are examples of the advertising and promotional materials used by LightRecycle Washington in 2019.

Information Card, 5" x 8" Updated in 2017

A vertical information card with a blue background. At the top is a white recycling symbol. Below it, the text reads: "RECYCLE UP TO 10 FLUORESCENT TUBES CFL or HID LIGHTS AT NO CHARGE THROUGHOUT WASHINGTON STATE". The text is in white and yellow. At the bottom is the LightRecycle Washington logo, which consists of a lightbulb icon inside a circle, followed by the text "LightRecycle WASHINGTON".

A vertical information card with a blue background. At the top, the text reads: "Recycling your unwanted fluorescent tubes, CFLs and HIDs has never been easier!". Below this, it says: "Simply drop off up to 10 lights per day at one of over 300 collection sites across WA. Visit LightRecycle.org and enter your city or ZIP code to find a collection site near you." The next section is titled "Why Recycle?" and explains: "Fluorescent and HID lights contain mercury, a toxic heavy metal and are illegal to throw out with regular garbage. Do your part to protect human health and the environment by recycling these lights properly." Below this are two sections: "Accepted Products" with a green checkmark icon and icons for fluorescent tubes, CFLs, and HID lights, and "NOT Accepted Products" with a red X icon and icons for LED, incandescent, and halogen lights. At the bottom, it says: "LightRecycle Washington is funded by the Environment's Recycling Charge (ERC). An ERC of \$0.95 per light is added to all mercury-containing lights sold at retail in Washington state." The LightRecycle Washington logo and contact information are at the bottom: "LightRecycle.org (877) 592-2972 x 354" and "LightRecycle WASHINGTON".
