

## **Model Development Technical Discussion Agenda**

### **Modeling Vessels and Anchorages**

**July 14th, 2021**

1. Introduction (1:00 pm)
  - a. Welcome
  - b. Meeting scope
  - c. Discussion logistics
  - d. Comments from Swinomish on anchorage areas
  - e. Other introductory comments from tribes or stakeholders
2. Anchorage Selection Process
  - a. Choosing an anchorage based on historical movements
  - b. Selecting an alternate anchorage if 1<sup>st</sup> choice is full
3. Vessels at Anchor
  - a. Selecting a duration of stay at anchor
  - b. Representing vessel swing while anchored
4. Incidents at Anchor
  - a. Potential for collisions while anchored
  - b. Potential for incidents resulting from dragging anchor
  - c. Potential for over the water transfer spills while at anchor
5. Additional Anchorage Topics
  - a. Will reliance on historical data mean that current trends in anchoring are not accounted for?
  - b. When evaluating AIS data, how do we determine which vessels are counted as anchoring?
6. Open Floor for Anchorage Modeling Topics
