Persons with hearing loss, call 711 for Washington Relay Service. Persons with a speech disability, call 877-833-6341.

Date of intended adoption: July 15, 2010
(Note: This is NOT the effective date)

Purpose of the proposal and its anticipated effects, including any changes in existing rules: In order to better manage water resources in WRIA 25, the local Watershed Planning Unit recommended that Ecology adopt, in rule, a water resource management strategy for the Basin. Recommendations were approved by Wahkiakum, Lewis, Cowlitz and Skamania county commissioners in July 2006.

The key rule elements include:

- Setting instream flow levels in the watersheds to protect aquatic resources, including habitat for threatened and endangered salmonids;
- Closing sub-basins to future withdrawals with the exception of seasonal water use from the region's larger streams;
- Establishing limited reservations of water for future use; and
- Specifying conditions for accessing the water reserves to benefit instream resources and better manage limited supply.

Reasons supporting proposal: RCW 90.82.130(4) states when a watershed plan is approved by a watershed planning unit and the county legislative authority, Ecology, as a participating member of the planning unit, is obligated to use the plan for making future water resource decisions for the watershed. The proposal also furthers Ecology's water management goals and statutory obligations.

Statutory authority for adoption: RCW 90.82, 90.54, 90.22, 90.03, and 90.44

Statute being implemented: RCW 90.03, 90.44, 90.54, and 90.82

Is rule necessary because of a:
