## Chapter 173-400 WAC, Chapter 173-401 WAC

Ecology is revising Chapters 173-400 and 173-401 WAC to comply with EPA's 2015 SIP call and make other changes. We are revising public notice requirements in both rules to require web posting of public notice on a comment period and draft permits. Public comment for air operating permits would begin with posting on an agency web site instead of publication in the Permit Register. Agencies must still send information to the Permit Register.
