About the Campaign
The Washington Department of Ecology – in partnership with the Washington State Parks - Clean Vessel Act Grant Program, Washington Sea Grant, Pump out Washington, and Clean Marina Washington – is conducting a Pump Out, Don’t Dump Out campaign throughout summer 2021. The goal is to remind boaters that Puget Sound is a No Discharge Zone and encourage everyone to properly dispose of their boat sewage.

We have a full suite of campaign resources available! For questions about the campaign contact Justine Asohmbom at the Washington Department of Ecology.

Get Involved
Become a Pump Out, Don’t Dump Out campaign partner and help spread the message. You can help protect our waters by encouraging boaters in your marina or community to pump out their holding tank. Commit to do at least one the following this summer!

- Publish pumpout messages and graphics on your social media accounts – See our sample posts on the next page.
- Post a photo of your pumpout or dump station and invite boaters to use your facilities.
- Publish a news release or article about the importance of clean waters and pumping out vessel sewage. Ecology’s webpage provides information to help you.
- Publish messages on your website, blog, newsletter, or any platform you use to communicate that Puget Sound is a No Discharge Zone and where to find pumpouts.
- Promote clean boating practices and hand out free pumpout materials. Ecology can provide dye tab packets to help boaters check their system for leaks.
- Thank the boaters in your marina for pumping out by offering incentives, discounts, or freebies.
- Request FREE aluminum, magnetic decal signs about the Puget Sound No Discharge Zone for your marina or boat launch.
- Send us a picture of your No Discharge Zone or pumpout sign with your facility in the background, so we can feature it in our social media outreach.
- Check your facility’s pumpout information for accuracy on the PumpoutWashington.org website and the Pumpout Nav app. Send updates or corrections to pumpouts@uw.edu. Remember to keep your pumpout facility operational and respond to reports of issues!
- Snap pictures of boaters using your pumpout or dump station and share it on your social media. Tag us using the handles and hashtags below so we can follow, like & share your posts this summer!
Sample Social Media Posts
Create your own content or choose from our list of samples below. Share images with your posts or include links to the websites and videos listed below. You can also share or retweet posts from the Department of Ecology’s Facebook, Twitter, Instagram, accounts or the Pumpout Washington Twitter page. Please don’t forget to use the hashtags so we can cross promote!
