173-166-130	Appeals.
173-166-140	Regulation review.

173-166-010

Purpose.

The legislature in 1989 gave permanent drought relief authority to the department of ecology and enabled ecology to issue orders declaring drought emergencies. Chapter 171, Laws of 1989 amends chapter [43.83B](#) RCW (Water supply facilities).

(1) Chapter 171, Laws of 1989 authorizes the Washington state department of ecology (ecology) to assist in alleviating future drought conditions throughout the state, and sets forth the criteria and procedures for implementing the 1989 drought relief legislation.

(2) Ecology has authority under chapter 171, Laws of 1989 to:

(a) Issue emergency permits to withdraw public waters as an alternate source of water supply.

(b) Approve water right transfers between willing parties.

(c) Provide funding assistance for eligible drought projects and measures.

173-166-020

Authority.

This regulation is promulgated by the department of ecology under authorities and procedures provided in chapter 171, Laws of 1989 after notification as provided in chapter [34.05](#) RCW.

173-166-030

Definitions.

As used in this chapter:

- (1) "Ecology" is the department of ecology.
- (2) "Drought conditions" are water supply conditions where a geographical area or a significant part of a geographical area is receiving, or is projected to receive, less than seventy-five percent of normal water supply as the result of natural conditions and the deficiency causes, or is expected to cause, undue hardship to water users within that area.
- (3) "Essential minimum" for the fisheries resource is:
 - (a) That amount of water or flow rate established as a regulation adopted by ecology pursuant to RCW [90.22.020](#) or [90.54.050](#);
 - (b) That amount of water or flow placed as a proviso on a water right permit or certificate; or
 - (c) That amount of water or flow established on an interim basis to assure the maintenance of fisheries requirements. Such a determination will be made by ecology, in consultation with, among others, the departments of fisheries and wildlife, any concerned federal agencies, and affected Indian tribes.
- (4) "Executive water emergency committee (EWEC)" is a committee, chaired by the governor's office, including members of state, local, and federal agencies which reviews water supply information provided by the water supply availability committee and determines potential effects of water shortages upon the state of Washington. Affected Indian tribes will be invited to participate.
- (5) "Geographical area" is an area within the state of Washington which can be described either by natural or political boundaries and which can be specifically identified in an order declaring a drought emergency. Examples of specific geographical areas include, but are not limited to:
 - (a) The state of Washington.
 - (b) Counties.
 - (c) Water resource inventory areas (WRIAs) as defined in chapter [173-500](#) WAC.
 - (d) Individual watersheds which constitute only a portion of a WRIA but whose boundaries can be topographically described.
 - (e) Groundwater management areas and subareas as defined in chapter [173-100](#) WAC.
 - (f) Designated sole source aquifers.
 - (g) Combinations of the above areas.
- (6) "Normal water supply" is:
 - (a) ~~For the purpose of the determination of~~ drought conditions, the median average amount of water available to a geographical area on an annual basis, relative to the most recent 30-year base period used to define climate normals. The determination of drought conditions will consider seasonal water supply forecasts, other relevant hydro-meteorological factors (e.g., precipitation, snowpack, soil moisture, streamflow and aquifer levels) and also may consider extreme departures from normal conditions over sub-seasonal timeframes, based upon evaluation of precipitation, streamflow, snowpack and other hydrological and meteorological factors.
 - (b) ~~For the purpose of eligibility for drought assistance:~~

~~(i) That amount of water put to beneficial use during the irrigation season for the irrigation of one or more crops, using reasonably efficient practices, including reasonable conveyance losses, under a valid water right permit or certificate, or a supported registered water right claim; or~~

~~(ii) That amount or flow of water required for normal operations of fish hatchery or fish passage facilities. Such facilities, where required by law, must be operating under a valid water right permit or certificate, or under a supported registered water right claim; or~~

~~(iii) The median amount or flow of water that is historically required to provide normal instream habitat conditions for the existing fishery population.~~

(7) "Previously established activities" include:

(a) The irrigation of a specified number of acres, using reasonably efficient practices, under a valid water right permit or certificate, or a supported registered water right claim.

(b) Those fish-management activities presently employed to maintain the fisheries resource. The resource itself must neither be restored nor enhanced by drought relief actions available under the provisions of this chapter.

(c) The delivery of water by public and private entities through existing supply systems to present populations, areas, and/or facilities for purposes that are nonagricultural and nonfishery related.

(8) "Reasonably efficient practices" are those practices including, but not limited to, methods of conveyance, use, and disposal of water which are reasonable and appropriate under the circumstances to bring about water use efficiency as determined by an area-specific application of criteria identified by ecology, which may include, among others:

(a) Customary practices in the area;

(b) Reasonableness of any facilities at the time of installation;

(c) Cost of improvements and impacts of the costs of upgrading facilities on the continued use of water by an appropriator;

(d) Changes in water use practices and technology; and

(e) Impact of alternative water use practices on other water uses and the environment.

(9) "Supported registered water right claim" is a registered water right claim which includes sufficient evidence to satisfy ecology that a valid water right would be confirmed should the claim be adjudicated. Applications made for emergency drought permits, ~~or~~ water transfers, ~~or~~ ~~funding assistance~~ under this chapter must incorporate, either by reference or inclusion, necessary information to enable ecology to make an informed determination with respect to the claim. Such information may include, but is not limited to:

(a) Documentation of continuous historical exercise of the claimed right;

(b) Historical maps depicting the historical means of irrigation and the areas covered by the claimed right;

(c) Legal documentation, including any previous court or administrative board decisions, which addresses the historical nature and extent of the claimed right;

(d) "Old-timer" testimony which addresses the historical nature and extent of the claimed right.

(10) "Water supply availability committee (WSAC)" is a committee, with a core membership consisting of ecology, the National Weather Service, the Soil Conservation Service, the U.S. Geological Survey, the U.S. Bureau of Reclamation, and other federal agencies involved in water supply forecasting, which reviews pertinent hydrological and meteorological information and assesses water supply conditions for the state of Washington.

173-166-040

General eligibility rule.

(1) Applications for emergency drought permits ~~or; water transfers, or funding assistance~~ must be made on a form provided by ecology for that purpose, and submitted in the manner stipulated.

(2) Applications made under this chapter will be processed only for previously established activities in a geographical area ~~or part of a geographical area~~ declared to be suffering from drought conditions. Where required by law, such activities must be conducted under a valid water right permit, certificate, or supported registered water right claim.

(3) Applications will be processed if the water user is receiving, or is projected to receive, less than seventy-five percent of normal water supply for the previously established activity and experiencing or expected to experience undue hardship as a result.

(4) All permits and approvals issued under this chapter will be subject to existing rights.

(5) Water obtained through the issuance of temporary permits ~~or; water right transfers, and/or funding assistance for projects or measures~~ must be put to beneficial use in lieu of water which is unavailable because of drought conditions.

(6) All permits and approvals issued under this chapter will be of a temporary nature and will contain an expiration date.

173-166-050

Forecast of drought conditions.

(1) Whenever it appears to the department of ecology that drought conditions as defined in WAC 173-166-030(2) either exist or are forecast to occur, ecology will consult with the state's water supply availability committee (WSAC) or its successor. Other appropriate sources of water supply information, such as the Columbia River water management group and the U.S. Army Corps of Engineers, may be consulted by the WSAC as needed.

(2) Should the water supply availability committee determine that a geographical area ~~or a part of a geographical area~~ is receiving, or is likely to receive, seventy-five percent or less of its normal water supply, it will advise the executive water emergency committee (EWEC) and the Indian tribes within the area ~~of that fact~~. The ~~executive water emergency committee~~ EWEC will then make a determination as to whether or not undue hardships will occur as a result of the shortage.

(3) Should the ~~executive water emergency committee~~ EWEC determine that an area will suffer undue hardship as a result of a reduced water supply, it will submit a recommendation to that effect to the governor for written approval. Affected Indian tribes will be notified at the time such a recommendation is submitted.

(4) Upon securing the written approval of the governor, ecology will then issue an order declaring a geographical area ~~or a significant part of a geographical area~~ to be suffering from drought conditions and publish that order in a newspaper of general circulation in the area affected by the order.

~~(5) The determination of drought conditions will be based upon the updated seasonal forecast as applied to the water supply conditions within the designated geographical area or part of a designated geographical area.~~

173-166-060

Orders declaring drought conditions.

(1) If the department of ecology determines that a geographical area ~~or part of a geographical area~~ is suffering from drought conditions, it may, upon the advice of the ~~WSAC water supply availability committee~~, with the concurrence of the ~~EWEC executive water emergency committee~~, and the written approval of the governor, issue an order to that effect.

(2) The order declaring drought conditions for a geographical area ~~or part of a geographical area~~ must contain the following elements:

(a) A description of the geographical area ~~or part of a geographical area~~ which is being so designated.

(b) The facts leading to the issuance of the order.

(c) The statutory authority upon which the order is being issued.

(d) The commencement date and termination date of the order. The termination date may be no later than one calendar year from the date the order is issued.

(e) Brief descriptions of the emergency actions which are possible under the order.

(f) Provisions for the termination of withdrawals if essential minimum flows are jeopardized.

(3) Ecology must publish the order declaring a geographical area ~~or a part of a geographical area~~ to be suffering from drought conditions in a newspaper of general circulation in the area affected by the order.

(4) Persons may file written protest as to the contents of the order with ecology. Ecology will have fifteen calendar days from the date of receipt of the protest in which to consult with members of WSAC, EWEC, and the governor and make a determination as to its validity, ~~using the procedure specified in WAC 173-166-050.~~

(5) A person who believes that an area should be declared to be suffering from drought conditions may petition ecology for such a declaration. Upon the receipt of such a petition, ecology will have fifteen calendar days from the date of receipt of the petition in which to make a determination as to its validity, using the procedure specified in WAC 173-166-050, and provide a decision to the applicant. The petition should contain the following information:

(a) A description of the geographical area ~~or part of a geographical area~~ which is being requested for designation.

(b) The nature of the relief sought in requesting such a designation.

(c) The facts upon which the petition is based.

(6) Orders declaring areas to be suffering from drought conditions may, with the written approval of the governor, be amended one or more times to change the termination date, provided that the termination date of the order, as amended, is no more than two calendar years from the date the order is first issued.

(7) Orders declaring areas to be suffering from drought conditions may be issued for different areas of the state and sequentially for the same area if drought conditions persist.

173-166-070

Emergency drought permits.

Ecology may allow water users to obtain water from alternate sources during drought conditions. To accomplish this, ecology may issue emergency drought permits authorizing withdrawals of groundwater and surface water, including dead storage in reservoirs. Permits will be processed under the following criteria:

(1) Applicants must be conducting a previously established activity within a geographical area ~~or part of a geographical area~~ declared to be suffering from drought conditions.

(2) An application will be processed if the water user is receiving, or is projected to receive, less than seventy-five percent of normal water supply, as the result of natural drought conditions, for the previously established activity and experiencing, or is expected to experience, undue hardship as a result.

(3) Ecology, plus all state and local agencies with authority to issue permits or other authorizations in connection with emergency actions authorized under the provisions of this chapter, will have fifteen calendar days from the date of receipt of the respective application(s) in which to provide a decision to the applicant. Agencies with authority to review applications for emergency drought permits, such as under RCW [75.20.050](#), and affected Indian tribes will have fifteen calendar days from the date ecology receives the application in which to provide ecology with an opinion as to any effects of the proposed withdrawal.

(4) Waters authorized to be withdrawn must be used in relation to a previously established activity as defined in this chapter. The permit must not cover irrigation of new lands, restoration or enhancement of the fisheries resource, or a new water ~~usesupply in addition to the normal amount used~~ than practiced in the past by individuals, private entities, or public bodies.

(5) ~~Waters to be withdrawn must constitute an alternate (supplemental) water supply to the user's normal source of water~~ Emergency drought permits may authorize replacing all or a portion of the normal supply that is unavailable due to drought, but cannot increase authorized use.

(6) The withdrawal must not reduce flows or levels below essential minimums necessary to assure the maintenance of fisheries requirements and to protect federal and state interests including, but not limited to, power generation, navigation, water quality, and existing water rights.

(7) Emergency drought permits issued under this chapter will be temporary in nature and must expire no later than the expiration date of the order declaring the area in which the permitted activity is authorized to be suffering from drought conditions.

(8) Priority will be given to domestic and irrigation uses of water for any emergency withdrawals authorized under this chapter.

(9) Emergency drought permits issued under this chapter must contain provisions for termination should the withdrawal reduce flows or levels below essential minimums as defined in this chapter.

(10) To expedite the issuance of emergency drought permits, ecology is authorized to process the applications and issue the permits without compliance with requirements for:

- (a) Notice of newspaper publication.
 - (b) The State Environmental Policy Act.
-

173-166-080

Temporary transfers of water rights.

(1) Ecology may approve emergency water right changes in order to effect a transfer of water between willing parties. Water right changes can include purpose of use, place of use, and point of diversion.

(2) Examples of possible water right transfers include, but are not limited to, the following situations:

(a) A water right holder may choose to reduce irrigated acreage and transfer the unused water to another water right holder whose normal water supply is decreased by drought conditions. ~~The acreage irrigated with transferred water on the second parcel may not exceed the acreage reduction on the first parcel.~~

(b) A water right holder may transfer a water right from an out-of-stream use to an instream use.

(c) Municipalities or other public bodies may transfer water between one another.

(3) Requests for water right transfers will be processed under the following criteria:

(a) Applicants must be conducting a previously established activity within a geographical area ~~or part of a geographical area~~ declared to be suffering from drought conditions.

(b) An application for a water right transfer will be processed if the recipient water user is receiving, or is projected to receive, less than seventy-five percent of normal water supply, as the result of natural drought conditions, for the previously established activity ~~and experiencing, or is expected to experience, undue hardship as a result.~~

(c) All approvals by ecology for water right transfers under this chapter will be temporary in nature and will be for the purpose of alleviating drought conditions. These approvals must terminate no later than the expiration date of the order which declares the area to be suffering from drought conditions.

(d) Water right transfers between willing parties may be approved when an emergency exists only if such a transfer will not affect existing rights whatsoever, or reduce flows or levels below essential minimums, or adversely affect federal and state interests including, but not limited to, power generation, navigation, and water quality.

(e) Water rights may be transferred within areas declared to be suffering from drought conditions. Water rights may also be transferred from outside an area declared to be suffering from drought conditions into an area declared to be suffering from drought conditions, provided such a transfer of water is physically possible and is consistent with the provisions of RCW [90.03.380](#), [90.03.390](#), and [90.44.100](#). Water rights will not be transferred from within an area declared to be suffering from drought conditions to outside that area.

(f) To expedite water transfers during drought conditions, ecology can approve temporary changes in water rights without compliance with requirements for:

(i) Notice of newspaper publication.

(ii) The State Environmental Policy Act.

(g) In those cases where temporary water transfers require court approval while general adjudication proceedings are ongoing, ecology will assist the court in coordination, maintaining communications, and providing technical assistance when requested.

(h) The temporary changing of a water right under this chapter will not be admissible as evidence in either supporting or contesting the validity of water claims in a general adjudication of water rights in the state of Washington.

(i) Ecology, plus all state and local agencies with authority to issue permits or other authorizations in connection with emergency actions authorized under the provisions of this chapter, will have fifteen calendar days from the date of receipt of the respective application(s) in which to provide a decision to the applicant. Agencies with authority to review applications for temporary water right transfers, such as under RCW [75.20.050](#), and affected Indian tribes will have fifteen calendar days from the date ecology receives the application in which to provide ecology with an opinion as to any effects of the proposed transfer.

173-166-090

Funding assistance—General criteria.

~~Ecology may provide funding assistance to public bodies for projects and measures designed to alleviate drought conditions relating to agricultural and fisheries survival. Funding is available from emergency agricultural water supply funds under RCW [43.83B.300](#). Funding assistance will be based upon the total funds available at the beginning of the current biennium. General criteria under which funds will be provided:~~

~~(1) Public bodies eligible to receive emergency funds are defined in RCW [43.83B.050](#) as ". . . the state of Washington, or any agency, political subdivision, taxing district, or municipal corporation thereof, an agency of the federal government, and those Indian tribes now or hereafter recognized as such by the federal government for participation in the federal land and water conservation program and which may constitutionally receive grants or loans from the state of Washington."~~

~~(2) The public body applying for emergency funds must be conducting the previously established activity for which they seek funding assistance within an area declared to be suffering from drought conditions as defined in WAC [173-166-030\(2\)](#).~~

~~(3) The public body applying for emergency funds must be receiving, or be projected to receive, less than seventy-five percent of normal water supply, as the result of natural drought conditions, for the previously established activity for which they seek funding assistance and experiencing, or be expected to experience, undue hardship as a result.~~

~~(4) Funding assistance will be for planning, acquisition, construction, rehabilitation, and improvement of water supply facilities and for other appropriate measures to assure the survival of irrigated agriculture and the state's fisheries resource.~~

~~(5) Funding assistance will be available only for projects or measures undertaken in response to drought conditions which are beyond the normal scope of operations of the public body applying for emergency funds.~~

~~(6) No more than ten percent of total available funds will be allocated for nonagricultural drought relief purposes, including the preservation of the state's fisheries during a given biennium.~~

~~(7) Funding assistance may be in the form of a loan or a grant or a combination loan and grant.~~

~~(8) Loans, grants, or combination loans and grants may be used as matching funds in cases where federal, local, or other funds are also available.~~

~~(9) Emergency loans may be approved with a payback period not to exceed fifteen years, with the interest rate to be equal to the final discount rate established for one year U.S. Treasury~~

Bills at the first auction following the beginning of the state fiscal year in which the loan is approved.

(10) Ecology, plus all state and local agencies that are affected by the proposed project or measure, in keeping with the emergency nature of these provisions, will process the respective application(s) and provide a decision(s) to the applicant in an expeditious manner.

(11) To expedite the implementation of drought relief projects and measures, ecology can approve funding assistance without compliance with requirements for:

(a) Notice of publication.

(b) The State Environmental Policy Act.

173-166-100

Funding assistance—Agricultural criteria.

(1) Funding assistance to alleviate drought conditions in irrigated agriculture will be provided under the following formula:

(a) No single entity will receive more than ten percent of the total funds available for drought relief.

(b) A loan may be made for up to ninety percent of total eligible project costs.

(c) A combination loan and grant may be made for up to one hundred percent of total eligible project costs.

(d) A grant or the grant portion of a combination loan and grant may be made for twenty percent of total eligible project costs if the public body being provided funds is within a geographical area declared to be suffering from drought conditions as defined in WAC 173-166-030(2).

(e) The grant or grant portion of a combination loan and grant may be made for up to forty percent of total eligible project costs if the public body being provided funds is receiving, or is forecast to receive, fifty percent or less of normal seasonal water supplies.

(f) A grant or the grant portion of a combination loan and grant may be amended to increase the grant up to forty percent of eligible project costs if drought conditions as defined in this chapter change after a grant has been signed for twenty percent of eligible project costs, provided:

(i) That the grantee qualifies for the higher grant as defined in (e) of this subsection; and

(ii) That the original grant agreement has not been terminated or closed out.

(g) The grant or grant portion of a combination loan and grant, once signed by all parties, may not be reduced despite any subsequent improvement in water supply conditions.

(2) Eligibility conditions for each proposed agricultural project or measure are:

(a) The proposed project or measure must be within an area declared to be suffering from drought conditions as defined in WAC 173-166-030(2).

(b) The public body applying for emergency funds must be receiving, or be projected to receive, less than seventy five percent of normal water supply and experiencing, or be expected to experience, undue hardship as a result for the previously established activity for which they seek funding assistance.

(c) The proposed project or measure must be for a beneficial use involving a previously established activity or purpose.

(d) The proposed project or measure must assist in alleviating a water shortage.

~~(e) The public body receiving the loan must satisfy ecology as to its ability to repay the loan and complete the project or measure.~~

~~(f) Water derived from the project or measure must be put to beneficial use as a substitute for water not available because of a drought.~~

~~(g) Water derived from the project or measure must not be used to irrigate new lands.~~

~~(h) The proposed project or measure must not adversely affect existing rights, including both instream and out-of-stream rights.~~

~~(i) All required permits and approvals for the proposed project or measure must be obtained by the applicant prior to a loan or grant agreement being signed.~~

~~(3) Eligible projects that may be funded for drought relief of irrigated agriculture include, but are not limited to:~~

~~(a) Pumps and accessories.~~

~~(b) Discharge lines.~~

~~(c) Pipelines.~~

~~(d) Canals and laterals with control structures.~~

~~(e) Liners for leaky pipes and canals.~~

~~(f) Diversion structures.~~

~~(g) Reregulating reservoirs.~~

~~(h) Measuring devices.~~

~~(i) Wells with pumps and accessories.~~

~~(4) Eligible measures that may be funded include the means for implementing water conservation procedures, acquiring alternate water sources, or transferring water rights, provided that the proposed measure represents an additional cost to the applicant as the result of drought conditions, and not as a substitute for normal water supply costs.~~

~~(a) Types of eligible measures for implementing water conservation procedures include, but are not limited to:~~

~~(i) Irrigation scheduling programs and activities, including the necessary personnel to accomplish such activities.~~

~~(ii) Education programs.~~

~~(b) Types of eligible measures for acquiring alternate water sources or transferring water rights include, but are not limited to:~~

~~(i) Water leasing fees.~~

~~(ii) Repair costs.~~

~~(iii) Power costs.~~

~~(5) Priority will be given to those proposed agricultural projects and measures which:~~

~~(a) Need additional water supplies. Need will be measured by:~~

~~(i) The short-term and long-term effects that the water shortage would have on the applicant's crops in the absence of drought relief;~~

~~(ii) The capability and reliability of the proposed project or measure to provide an emergency water supply to the applicant;~~

~~(iii) The percent of water shortage expected for each applicant.~~

~~(b) Are the most effective in achieving long-term reductions (conservation) in water requirements and/or more efficient use of available supplies.~~

~~(c) Present no, or minimal, overall environmental impacts, including any detrimental effects to wetlands. Any such impacts should be identified to the best extent possible by the applicant at the time of application.~~

~~(6) Preference will be given to those public bodies implementing water conservation plans, water system efficiency improvements, and other drought contingency actions in addition to the funding assistance applied for under this chapter.~~

173-166-110

Funding assistance—Fisheries criteria.

~~(1) Ecology may provide funding assistance to alleviate drought conditions affecting the state's fisheries resource provided that no other capital budget funds are available for these purposes at the date of application, as verified by the office of financial management. Funding assistance will be based upon the following formula:~~

~~(a) A loan may be made for up to ninety percent of total eligible project costs.~~

~~(b) A combination loan and grant may be made for up to one hundred percent of total eligible project costs.~~

~~(c) A grant or the grant portion of a combination loan and grant may be made for twenty percent of total eligible project costs if the public body being provided funds is within a geographical area declared to be suffering from drought conditions as defined in WAC 173-166-030(2).~~

~~(d) The grant or the grant portion of a combination loan and grant may be made for up to forty percent of total eligible project costs if the public body being provided funds is receiving, or is forecast to receive, fifty percent or less of normal seasonal water supplies.~~

~~(e) A grant or the grant portion of a combination loan and grant may be amended to increase the grant up to forty percent of eligible project costs if drought conditions as defined in this chapter change after a grant has been signed for twenty percent of eligible project costs, provided:~~

~~(i) That the grantee qualifies for the higher grant as defined in (d) of this subsection; and~~

~~(ii) That the original grant agreement has not been terminated or closed out.~~

~~(f) The grant or grant portion of a combination loan and grant, once signed by all parties, may not be reduced despite any subsequent improvement in water supply conditions.~~

~~(g) No more than ten percent of total funds available at the beginning of the current biennium will be allocated for nonagricultural drought relief purposes, including the preservation of the state's fisheries, during that biennium.~~

~~(2) Eligibility conditions for each proposed fisheries project are:~~

~~(a) The project lies within a geographic area declared to be suffering from drought conditions.~~

~~(b) The proposed project must assist in alleviating the water shortage.~~

~~(c) Water from the proposed project must be put to beneficial use as a substitute for water not available because of the drought.~~

~~(d) Water derived from projects that are provided funding assistance must not be used to restore or enhance the fisheries resource.~~

~~(3) Eligible projects that may be funded for the protection of fish culture at hatcheries from drought conditions include, but are not limited to:~~

~~(a) Purchase and installation of water reuse pumps.~~

~~(b) Modifying hatchery outlet structures.~~

~~(c) Modifying stream channels adjacent to a hatchery to assure passage to the holding pond.~~

~~(d) Provision and maintenance of oxygen levels in offsite holding ponds by purchase and installation of bottle gas (using air stones), or oxygen generation systems, or mechanical aeration.~~

~~(4) Eligible projects that may be funded to protect instream fish habitat from drought conditions include, but are not limited to:~~

~~(a) Augmentation of instream flows through transfers of diversionary surface and groundwater rights.~~

~~(b) Augmentation of instream flows through temporary withdrawals of groundwaters.~~

~~(c) Stream channel modification such as trenching, sandbagging, or berming to protect spawning gravels.~~

~~(5) Eligible projects that may be funded to optimize fish survival during drought conditions include, but are not limited to:~~

~~(a) Capture and relocation of stranded fish.~~

~~(b) Stream channel modification such as trenching, sandbagging, or berming to provide migratory channels for fish passage.~~

~~(6) The departments of fisheries and wildlife, plus any potentially affected Indian tribes, will be consulted to verify eligibility, needs, and nature of all proposed fisheries projects and measures.~~

~~(7) Preference will be given to those public bodies implementing water conservation plans, water system efficiency improvements, and other drought contingency actions in addition to the funding assistance applied for under this chapter.~~

173-166-120

Requests for drought relief—Contacts—Applications.

~~(1) Information regarding implementation of this chapter, and applications for emergency drought permits, water right transfers, and/or funding assistance can be obtained from the ecology headquarters office, water resources program, or from any of the four ecology regional offices. Ecology regional offices are located in Redmond, Spokane, Tumwater, and Yakima.~~

~~(2) Copies of statutes and regulations cited in this chapter may be obtained from the ecology headquarters office in Olympia.~~

~~(3) Ecology actions pertaining to the determination of which areas are suffering from drought conditions, the issuance of orders declaring areas to be suffering from drought conditions, plus any actions concerning protests of such declarations or petitions for consideration for such a designation will be conducted by the ecology headquarters office, water resources program.~~

~~(4) Ecology actions pertaining to emergency drought permits and water right transfers will be conducted by the appropriate ecology regional office.~~

~~(5) The ecology headquarters office, water resources program, will administer funding assistance and manage the drought relief program in accordance with the provisions of this chapter.~~

173-166-130**Appeals.**

All final written decisions of the department of ecology made pursuant to this chapter shall be subject to review by the pollution control hearings board in accordance with the provisions of chapter [43.21B](#) RCW.

173-166-140**Regulation review.**

The department of ecology will initiate a review of the rules established in this chapter whenever new information, changing conditions, or statutory modifications make it necessary to consider revisions.
