## 14-DAY PUBLIC NOTICE

**REVISION:** This notice revises the total amount of material proposed to be dredged on the U.S. Army Corps of Engineers/Washington Department of Ecology Joint Public Notice dated February 1, 2017.

The revised information is as follows: The applicant, Emerald Kalama Chemical, LLC, is proposing to dredge a total of 8,000 cubic yards (cy) of sediment over a 10-year period. The original public notice specified the applicant proposed to remove 5,000 cy. The increase in volume is requested because an updated bathymetry survey indicates more material has accreted in the dredge area than previously determined. The applicant is requesting the increase to ensure future unimpeded vessel access to the existing structure.

All other information on the Joint Public Notice dated February 1, 2007 for NWS-2016-192 remains unchanged.
