2018-J00-018	Preliminary Agreement Between the Lower Elwha Klallam Tribe and the State of Washington Department of Ecology	Preliminary Agreement	Lower Elwha Klallam Tribe and Dept. of Ecology	7/1/1999	The Environmental Protection Agency, Region 10, has recommended that the Rayonier Mill site be placed on the National Priority List for cleanup as a Superfund site. This recommendation is based, in part, on the EPA's federal trust responsibility to the Tribe, which has important cultural, historical, and natural resources at and in the area affected by releases from the mill site. Ecology has suggested that EPA not list the site in favor of a cleanup under state law. The Tribe has indicated that it will support deferral of NPL listing if it receives satisfactory assurance of sufficient resources for substantive Tribal participation and oversight of the project to ensure the Tribe's cultural and historical resources; commercial, ceremonial and subsistence fisheries; economic security; health and welfare; and such other governmental interests as may be affected by releases in the vicinity of the mill site are restored and protected from further physical or chemical damage. It is the purpose of this agreement to state the general undertakings of Ecology and the Tribe in arriving at those assurances.
