REVISED Attachment C – Ecology Recommended Changes to City of Sumas SMP

The following changes are recommended to clarify elements of the City's amended SMP

ITEM	SMP Submittal Provision (Cite)	TOPIC	BILL FORMAT CHANGES (underline = additions; strikethrough = deletions)	RATIONALE & CITY RESPONSE
01	Policy 2.7	Historical/Cultur al Resources	Addition of the following policy: Policy 2.7C: Protection and rehabilitation of significant archaeological, historic, and cultural sites should be encouraged and, where appropriate, should be required.	These changes were requested by the City of Sumas in response to comments received by the Washington State Department of Archaeology and Historic Preservation.
02	Policy 6.1B	Archaeological Areas and Historic Sites	Policy 6.1B: In areas documented to contain archaeological or cultural resources, developers shall should be required to have the site inspected and evaluated by a professional archaeologist in consultation with affected Indian tribes prior to permit issuance.	The City of Sumas accepted this change.
03	Policy 6.1C	Archaeological Areas and Historic Sites	Policy 6.1C: Developers <u>shall should</u> be required to stop work immediately and notify City officials, affected Indian tribes and the state department or archaeology and historic preservation if sites containing archaeological or cultural resources are uncovered during excavation.	
04	Policy 6.1E	Archaeological Areas and Historic Sites	Policy 6.1E: In accordance with state law, all activities and development within shoreline jurisdiction shall comply with the applicable requirements of RCW 27.44, RCW 27.53, RCW 68.58, RCW 68.60 and WAC 25-48-060.	
05	15.04.530.J.c	Utilities	Major utility facilities, which include transmission lines, treatment plants and other similar facilities, shall only be permitted as conditional uses.	The added language defines the term major utility facility based on language suggested by the City of Sumas.
06	15.04.200.F.4	Permit Revisions	For each approved permit revision, the Administrator shall tansit transmit said revised permit to the Department and notify parties of record consistent with the provisions set forth under subsection 16.04.160(H) of this program.	The City of Sumas accepted this change. Minor scrivener's error. The City of Sumas accepted this change.
07	15.04.030	Definitions	SUBSTANTIAL DEVELOPMENT – Means any development of which the total cost or fair market value exceeds \$5,000.00 6,416.00 or as this amount is hereafter adjusted for inflation pursuant to RCW 90.58.030(3)(e), or any development which materially interferes with normal public use of the water or shorelines of the state; EXCEPT that the classes of development listed under Section 16.04.090(A)(1) through (14) shall not be considered substantial developments.	The substantial development dollar threshold was increased to \$6,416.00 on September 15, 2012. The City of Sumas accepted this change.
80	Policy 7.7	Recreational Development	Policy 7.7J: The City should work in cooperation with the Washington Departments of Ecology and Fish and Wildlife to explore opportunities to reconfigure stream channel morphology in that segment of Johnson Creek between Cherry Street and Sumas Avenue to provide safe access for fishing and other water-dependent recreational activities while protecting, restoring and enhancing the shoreline functions provided in that area.	These changes are requested by the City of Sumas. In 2012, the Sumas Planning Commission recommended to the City Council add these provisions to the draft master program. The recommended policies and regulations were presented to the City Council at the June 2012 public hearing. The City Council supported the additions, however the provisions were inadvertently not included in the final draft adopted in 2014.
09	15.04.530.G.2	Recreational Development	 i. Any reconfiguration of stream channel morphology to provide safe access for fishing and other water-dependent recreational activities shall mitigate impacts to ensure no net loss of shoreline ecological functions and ecosystem-wide processes. Any such proposed action shall require approval of a City shoreline 	The City of Sumas accepted these changes.

			conditional use permit as well as Hydraulics Project Approval from the

ITEM	SMP Submittal Provision (Cite)	TOPIC	BILL FORMAT CHANGES (underline = additions; strikethrough = deletions)	RATIONALE		
10	15.04.030	Definitions	<u>BUFFER</u> – Means an upland land area adjacent to a shoreline, river, stream, wetland or critical area that protects the water feature or area from human disturbance by providing separation between the area and the adjacent land uses. A buffer shall be measured horizontally from the wetland edge or ordinary high water mark where appropriate. <u>Buffers shall not apply to areas functionally and effectively disconnected from a stream, wetland or other critical area beyond a developed structure, such as a residence, roadway or other impervious surfaces, where such disconnection has been lawfully established.</u>	This change is requested by the City of Sumas. In 2012, the Sumas Planning Commission recommended the change to the City Council. The change was presented and supported by the Council during the June 2012 public hearing on the draft SMP. The change was inadvertently not included in the final draft SMP adopted by the City Council in 2014. The City of Sumas accepted this change.		
11	15.04.030	Definitions	REGULATORY STREAM LIMIT (RSL) — Means the outer edge of a river or stream system that is established to determine the minimum shoreline setback. The RSL shall be defined as the top of the bank where it can reasonably be identified. If the stream does not have a reasonably located top of bank, then the RSL shall be 10 feet landward of the ordinary high water mark.	This change is requested by the City of Sumas as the term Regulatory Stream Limit is not referenced within the updated SMP and is no longer relevant. The City of Sumas accepted this change.		
12	15.04.100	Statement of Exemption	B. No statement of exemption from the substantial development permit process is required for developments normally exempt by Section 15.04.090 SMC unless specifically required elsewhere in this program, PROVIDED however that a statement of exemption shall be obtained from the Administrator prior to beginning development on shorelines under the jurisdiction of this program if uncertainty exists about the exemption status of the development.	This change is recommended to eliminate the conflict with the language in 15.04.100.A which requires that all statements of exemption be in writing and include a summary of the Administrator's analysis of the consistency with the Act and SMP. Written exemptions are also recommended as a method of tracking shoreline development and no net loss over time.		
13	15.04.410	Urban Conservancy- Wetland Environment	The purpose of the "urban conservancy-wetland" environment is to protect and restore ecological functions of open space, floodplain, and other sensitive lands where they exist in urban and developed settings in proximity to wetlands located within the 100-year floodplain, while allowing for a variety of compatible uses. <u>Development within wetlands shall comply with Sections 15.04.471 through 15.04.475 of this program.</u>	The City of Sumas accepted this change. This change is recommended to remind the reader of the specific regulations applicable to wetlands within the SMP. The City of Sumas did not accept this change.		
14	15.04.420.B	Urban Conservancy- Wetland	Industrial development, outside of Conservancy wetlands when measures have been taken to avoid, minimize and mitigate impacts to wetlands and where the development results in no net loss of shoreline ecological functions and processes.	These changes are recommended to clarify that developments are not allowed within wetlands.		
15	15.04.420.F	Environment – Permitted Uses	Residential development, except in Conservancy wetlands when measures have been taken to avoid, minimize and mitigate impacts to wetlands and where the development results in no net loss of shoreline ecological functions and processes.	The City of Sumas did not accept these changes.		

ITEM		TOPIC	BILL FORMAT CHANGES (unde	erline = additions; strikethrough = deletions)	RATIONALE
habitat conser areas - Perfori		Fish and wildlife habitat conservation areas – Performance requirements	B. Buffers. Buffers are upland areas adjacent to fish and wildlife HCAs that are intended to provide sufficient separation between the habitat feature and the surrounding areas and uses to protect the habitat from disturbance from human activities. Buffers also provide vital upland habitat for wildlife species that require stream habitat as part of their life cycle. Buffers shall be measured horizontally in a landward direction from the ordinary high water mark (OHWM) or top of bank, as noted below, for stream habitats and from the outermost edge of upland habitat areas.		This change is requested by the City of Sumas. Historically, the City measured shoreline setbacks from the top of bank instead of from OHWM. The City would like to retain the top of bank requirement on Sumas and Bone Creeks to simplify the review process on these features which contain distinct grade breaks. The City of Sumas accepted this change.
			C. Standard Buffers. 1. The following standard buffers shall be established for the following fish and wildlife HCAs based on designation and classification. Standard buffers are assumed to be comprised of a moderately intact native vegetation community that is adequate to protect the functions and values of the resource at the time of the proposed activity. Stream Habitat – Standard Buffers. The following standard buffers shall be established for all Stream Habitats based on their classification:		
			River/Stream	Standard Buffer	
				In some locations site-specific buffers have been established through this Master Program and are identified as such on the Official Shoreline Map. In those areas where site-specific buffers have not been established, the stream buffer shall be 100 feet from the OHWM.	
			Sumas Creek	50 feet from top of bank 50 feet from top of bank	
17	15.04.470.C	Floodplains	Bone Creek 5. Development on shorelands with Species Act and the FEMA Biological	I nin the floodplain shall comply with the Endangered	This addition recommended to acknowledge federal requirements for development within floodplain areas.
					The City of Sumas did not accept this change.
18	15.04.475.D.4	Activities allowed in wetlands, streams, and buffers	, , ,	icable County or state storm water management to local and state wetland and storm water codes,	The change provides further clarification on what standards may be applicable. The City of Sumas did not accept this change.

ITEM	SMP Submittal Provision (Cite)	TOPIC	BILL FORMAT CHANGES (underline = additions; strikethrough = deletions)	RATIONALE
19	15.04.530.D.2.e	Industrial Development	Industrial developments shall mitigate impacts to wetlands through wetland replacement, enhancement <u>pursuant to Section 15.04.474</u> or, alternatively, provide other comparable means of enhancing the water resource and the public's visual and aesthetic enjoyment of	This change is recommended to provide a cross-reference to the applicable wetland regulations in the SMP.
20	15.04.530.G.f	Recreational Development	these resources with the approval of the City. Associated parking is prohibited in the shoreline area, with the exception of scenic pullouts, view points, and trailheads; provided that designated parking areas for public parks shall be allowed, but shall be setback at least 100 feet from the ordinary high water mark or	The City of Sumas did not accept this change. This change is recommended as a reminder that buffers still apply in addition to the setback requirement for new recreational parking.
21	15.04.530.H.d	Residential Development	from required HCA and/or wetland buffers, whichever is greater. Residential development shall mitigate impacts to wetlands through wetland replacement, enhancement or equivalent mitigation pursuant to Section 15.04.474.	The City of Sumas did not accept this change. This change is recommend to provide a cross-reference to the applicable wetland regulations in the SMP.
				The City of Sumas did not accept this change.
22	15.04.530.I.I	Transportation – Roads and Parking	Parking facilities are not a water-dependent use and shall only be permitted in the shoreline area to support an authorized use where it can be demonstrated that there is no feasible alternative location away from the shoreline. Parking facilities shall be set back from the waters' edge (including wetlands) and screened from less intense adjacent land uses by vegetation, undeveloped space, or structures developed for the authorized primary use.	This change adds emphasis that shoreline areas include associated wetlands. The City of Sumas did not accept this change.
23	15.04.530.J.2.a	Utilities	Construction of utilities is permitted provided that there is appropriate documentation that the facility cannot be feasibly located outside of shoreline jurisdiction <u>including wetlands</u> , <u>streams</u> , and their <u>buffers</u> , due to uses served or the need to cross shorelands to connect specific end points.	This change adds emphasis that shoreline jurisdiction includes wetlands, streams and buffer areas. The City of Sumas did not accept this change.
24	15.04.540.H.2.o	Shoreline Stabilization	Proposed shoreline stabilization projects which could alter wetlands as a result of landfill or other shoreline activity shall be assessed relative to impacts upon the area's physical and biological characteristics. Impacts identified with a proposed action shall be avoided or mitigated consistent with applicable City requirements, and recommendations from applicable state, federal and tribal agencies.	This change is recommended to acknowledge that new shoreline stabilization on streams can also impact associated wetlands. The City of Sumas did not accept this change.
