

The Washington Materials Management & Financing Authority is required to file an annual report with the Washington State Department of Ecology. This workbook contains data and information requested in order to meet compliance with WAC 173-900-800 and additional information required via passage of SHB 1498 in April of 2013. The workbook is designed to provide data and information in the format listed in the index outlined below, as specified in WAC 173-900-800 and as amended with the passage of SHB 1498.

***NOTE:** All figures and data in this report are estimates based on actual source documents including processor invoices with actual weights and charges, collector bills of lading showing estimated weights - converted to actual weights after verification through processor and transporter receipts, and other information received from collectors and processors including "collector logs" which include source and volume estimates by entity type.

Workbook Index

TAB
↔

1. Total weight (in pounds) of covered electronic products (CEPs), including orphans, for the 2014 program year including documentation verifying collection and processing for:
 - a. CEP pounds collected, by type, by county
 - b. CEP recycled pounds, un-recycled residuals, and reused - by ALL program Direct Processors
 - c. Standard Plan CEP materials disposition - mass balance report
 - d. Pounds collected and processed verification - based on paid processor invoices for covered materials
2. Total weight of CEPs received from each nonprofit charitable organization primarily engaged in the business of reuse and resale used by the Standard Plan.
3. Total weight of CEPs received in large quantities from small businesses, small governments, charities and school districts.
4. A list of collection services provided in each county and each city with a population of greater than 10,000 and the parties who operated them.
5. Processor information:
 - a. A list of all direct processors used; **(see section 1.b.)**
 - b. The weight of CEPs processed by each direct processor; **(see section 1.b.)**
 - c. A description of the processes and methods used by each direct processor to recycle the CEPs including a description of the processing and facility locations.
 - d. A compliance audit report meeting the requirements in WAC 173-900-365 for each direct processor listed in the Standard Plan.
(Note: A link to the Standard Plan containing these audit reports as posted on the Ecology web site can be used to meet this requirement.)
7. A brief description of the educational and promotional efforts that were undertaken to inform covered entities about where and how to reuse and recycle their CEPs.
8. The results of sampling as required in WAC 173-900-900.
9. Total weight of unwanted electronic products, electronic components, and electronics scrap that have been exported from Washington state to countries that are not members of the Organization for Economic Cooperation and Development or the European Union.
10. A list of manufacturers that are participating in the Standard Plan.
11. Documentation of work done with direct processors used by the Standard Plan to promote and encourage the design of electronic products that are less toxic and contain components that are more recyclable.
12. Any information available regarding the reuse of CEPs through the E-Cycle Washington program.
13. Program revenue and cost.
14. Signature of the Authority.

MASS BALANCE REPORTING

NOTE: Total INBOUND pounds must equal total OUTBOUND / IN PROCESS pounds

**Covered Electronic Products (CEP's) collected for recycling by the WMMFA in 2014
from non-profit charitable organizations primarily engaged in re-use through re-
sale.**

All net pounds collected and paid for in 2014 - total - weights verified at processing

Does NOT include pounds of working or refurbished devices a charity collected as part of the program and sent to reuse (see section 12 for reuse estimates at collector level)

Processors participating in WMMFA Standard Plan - Description of processes and methods Reference to compliance audits

The information listed below represents a summary of processor locations and processing methods of each of the approved processors participating in the Standard Plan. Processes listed include any and all processors utilized for any quantity of materials in 2014 with data based on most recent audits. For the most current compliance audit report please refer to the WMMFA Standard Plan Processor section at this link:

Scrap Wood	Removed from CEP by hand-dismantling.	Solid Waste Landfill (via Transfer Station)	USA

ECS Refining, 705 Reed Street, Santa Clara, CA 95050	Ken Taggart	(408)200-7021
---	--------------------	----------------------

Material Of Concern	Recycling Process	Fate of Recycling Process	End of life processing-Destination Country
CPU's and selected Electronic Devices	Most electronic devices are dismantled, however, some are evaluated for reuse and/or refurbishment	Downstream recyclers of post dismantled and post shredded commodities are discussed below.	See Below USA
CRTs	Most CRT's are dismantled and the glass is crushed on site	Downstream recyclers are discussed in Lead Containing Glass, below.	See Below USA
CRT Glass	CRTs that are not refurbished for resale are dismantled and the glass is crushed on site.	ECS prefers to ship lead- containing glass to a CRT Tube manufacturer, which uses the glass to make new CRT Tubes (glass to glass recycling). Lead-containing CRT Glass not shipped for glass-to-glass recycling is shipped to a Lead (Pb) Smelter which recovers the lead as a commodity and sells it on the world market.	Mexico, USA, Canada, India
Circuit Boards (Whole)	Circuit Boards are shredded to a minus 2" particles size. The iron & aluminum are removed by magnetic & eddy current separation.	Shredded circuit boards are shipped to a primary copper smelter which recovers copper, gold, silver and palladium as well as other minor elements. The metals are sold as commodities on the world market.	Canada
Batteries	Batteries are manually removed from electronic devices. The batteries are sorted by type (Alkaline, Lithium, etc.).	Lead/Acid batteries are shipped to a battery manufacturer which recycles the batteries by melting the lead and using it in the manufacture of new batteries.	USA
		Silver oxide batteries are smelted at ECS Refining Santa Clara and their silver content is captured by ECS. Post smelted materials are sent for further precious metals processing.	USA
		All other batteries are shipped to a high temperature alloy producer which melts the batteries by their specific type to recover the respective metals.	USA
Mercury Devices	Mercury devices are received and stored for off-site processing (fluorescent lighting tubes, for example) or mercury devices may be manually removed from other electronic devices.	All mercury-containing devices are shipped to an EPA approved mercury recycler which removes the mercury from the device and produces mercury as a commodity for sale.	USA
Polychlorinated Biphenyls PCBs	PCBs are not "accepted" for storage or processing at ECS. However, ECS may transfer PCB's to an approved TSDF	ECS provides transportation services to an authorized TSDF or recycler.	USA
Non-Materials of Concern	Recycling Process	Fate of Recycling Process	Destination

Steel	Electronic scrap is shredded to a minus 2" particle size and then the steel is magnetically removed.	The steel is shipped to a steel mill where the steel is melted to produce new steel products (steel rod, plate or bars)	Brokers
Plastics	Plastics are manually removed from the electronic scrap and baled by type of plastic (ABS, HIPS, PC etc.)	The plastic is sold to a plastics processor which grinds the plastic for sale as a raw material feed to manufacturers of plastic products.	Brokers
Insulated Wire	Wire is manually and mechanically removed from electronic scrap.	The wire is shipped to a wire chopping company which mechanically chops the wire and then uses air and/or water to separate the copper from the plastic. The copper & plastic are sold as commodities.	Brokers
Aluminum	Electronic scrap is shredded to a minus 2" particle size and then the aluminum is removed by eddy current separation.	The aluminum is shipped to aluminum alloyers which melt the aluminum and produce aluminum alloys for sale.	Brokers
CRT Yokes	Yokes are compacted and baled on site.	The yokes are shipped to copper alloyers, which melt the yokes and produce copper alloys for sale.	Brokers
Copper	Copper scrap is shredded to a minus 2" particle size and then copper is removed by magnetic separation	The copper is shipped to copper alloyers, which melt the copper and produce copper alloys for sale.	Brokers

ERI Inc., 2302 West Valley Highway, Ste 300., Auburn, WA 98001		Aaron Blum	(206)577-1490
--	--	------------	---------------

Material Of Concern	Recycling Process	Fate of Recycling Process	End of life processing-Destination Country
CRT Glass	It is removed from CEP and screen and metal gun removed.	Glass to Glass recycling to be reused in new CRT products.	For processing: Mexicali, BC, Mexico For final furnace: Gujarat, India
Circuit Boards	Boards are removed from CEP by manual separation. They are then sent to our Fresno facility for shredding.	Precious Metals Recovery	USA, Belgium or South Korea
Batteries	Removed manually and sorted by type	Metal Recovery	All Types: USA
Mercury devices	Removed manually and managed as universal waste.	Mercury Recovery	USA
Non-Materials of Concern	Recycling Process	Fate of Recycling Process	Destination
Steel	Removed Manually and sent to Fresno to be shredded	Metal Recovery	USA
Plastics	Removed manually from CEP and bailed	Plastics Recovery	ASIA
Insulated Wire	Removed manually from CEP and sent to Fresno for Shredding	Metal Recovery	Belgium or Korea
Aluminum	Removed manually from CEP and sorted.	Metal Recovery	USA

---	--	-------------	---------------

Material Of Concern	Recycling Process	Fate of Recycling Process	End of life processing-Destination Country
CRT Leaded Glass	Removed from monitors; screen and metal gun removed	Glass to glass, all materials are reused in new CRT	Mexico (glass washing), India (CRT manufacture)
Circuit Boards	Removed from electronic equipment by hand dismantling or automated shred/sort process	Precious metals recovery	South Korea, Japan or Sweden
Batteries	Hand removed from electronic equipment, hand sorted by type.	Metal recovery	USA
Mercury devices	Hand removed from CEP, managed as universal waste	Mercury recovery	USA
Non-Materials of Concern	Recycling Process	Fate of Recycling Process	Destination
Steel	Removed from electronic equipment by hand dismantling or automated shred/sort process	Metal recovery	USA
Plastics	Removed from electronic equipment by hand dismantling or automated shred/sort process	Plastics recovery	USA or China
Insulated Wire	Removed from electronic equipment by hand dismantling or automated shred/sort process	Metal recovery	USA
Aluminum	Removed from electronic equipment by hand dismantling or automated shred/sort process	Metal recovery	USA

WMMFA Educational and Promotional efforts cumulative and 2014 - summary

In 2013, collaborating with the outreach workgroup, the WMMFA implemented a 5th year anniversary outreach strategy designed to engage mainstream media in Eastern and Western Washington. This plan dedicated resources to reaching Spanish speaking communities through pre-packaged media/content and community outreach. The plan targeted mainly rural communities based upon their lower CEP collections per capita in comparison to counties with above average pounds per capita contributions. Documentation and samples of media production / results is provided below along with summary documentation outlining specific outreach strategies. A table with estimated impact of this outreach is provided at the bottom of this section.

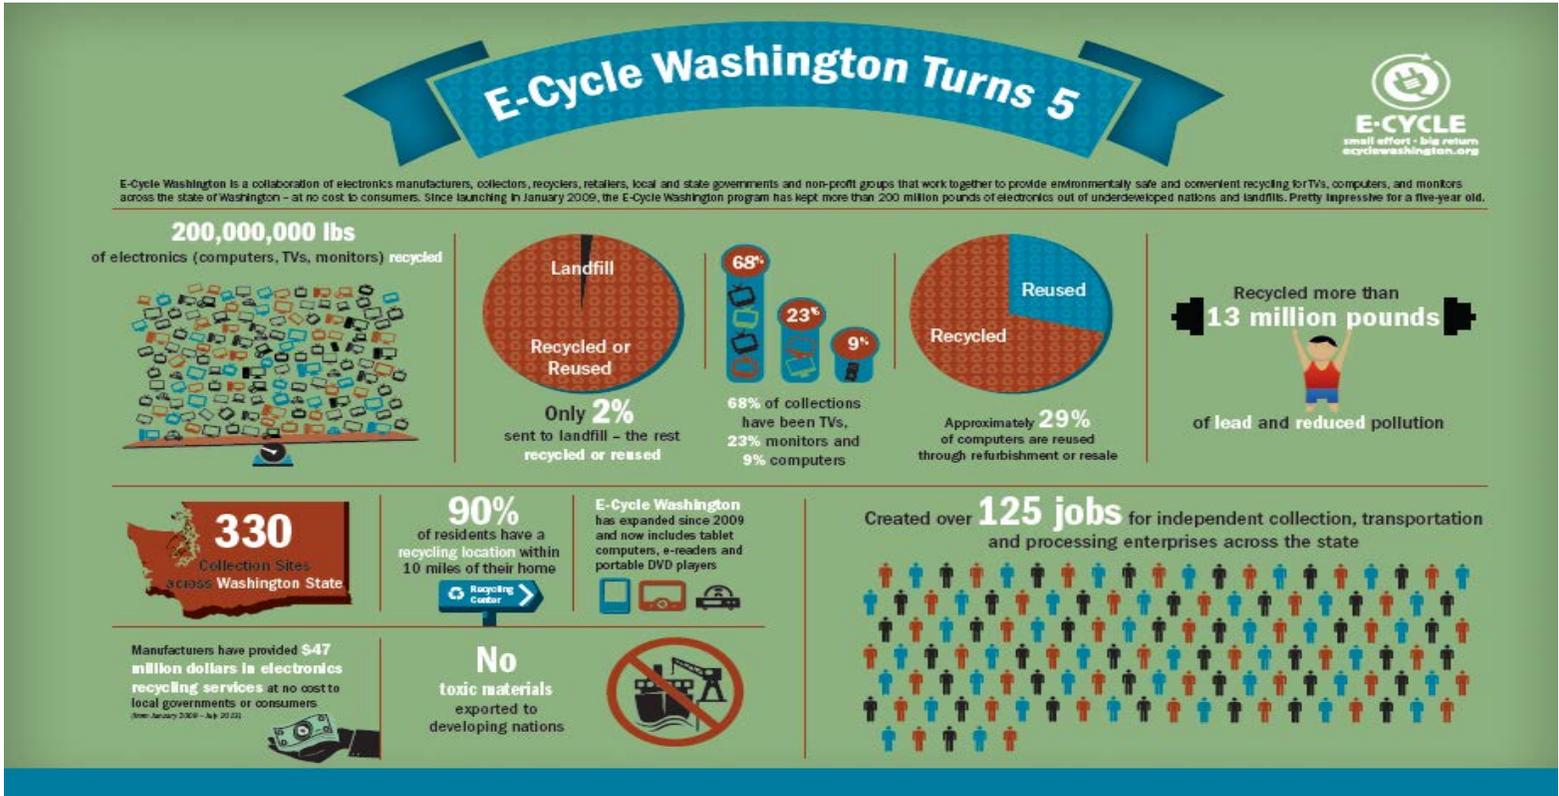

In 2014 the WMMFA continued outreach efforts to ensure that information about where, how, and why to recycle CEP's was available to all state residents.

Methods and strategies for the months of April through August 2014:

- Utilization of news talk radio KIRO-FM for reaching those most likely to regularly update their technologies
- Internet audio streaming of 15 and 30 second spots (same spots as used on radio) through MyNorthwest.com
- Display advertisements on MyNorthwest.com with links directly to E-Cycle Washington website
- KIRO Radio spots 10 per week morning drive time, 10 per week prime time, 10 per week random time with matching audio stream 30 times per week
- 100,000 impressions per week at MyNorthwest.com

THE MATERIALS PRESENTED BELOW OFFER A HISTORICAL PERSPECTIVE ON E-CYCLE WASHINGTON OUTREACH EFFORTS OF THE WMMFA

The WMMFA also provides posters, banners, and brochures to collectors and any interested parties requesting them. In summary the WMMFA has created and sponsored placement of TV spots, web banners, click to call, video display, and mobile advertising opportunities statewide since inception.

Brief description of some of the E-Cycle coverage

E-Cycle Coverage

- KNDU Yakima ran a TV story featuring E-Cycle and a local collector on 10/23
- KPQ radio in Wenatchee ran a story featuring E-Cycle and Goodwill on 10/23
- KOMO radio in Seattle ran a story on E-Cycle on 10/24 and recorded a follow-up interview on 11/8 – I will get this clip when available
- KOMO online ran a story on 10/24
- The Columbian published a news brief on October 25
- KIT radio in Yakima ran a story on E-Cycle on 10/24 based on KNDU's coverage
- KING ran a story on 11/12

Hispanic Coverage

- A Spanish story from our event ran on KUNS at 6:00 and 11:00 PM newscasts on 10/23
- Hispanic Business ran a story 10/26
- Tu Decides ran a story on 11/1
- A total of 115 Spanish spots ran on radio stations KDYK, KMMG, KZML, KZTA and KZTB

WEB and mobile network outreach:

The WMMFA financed and produced a 15 second and a 30 second video advertising spot via agreement with KIRO TV in early 2012.

The WMMFA had 100,000 monthly mobile banner ad impressions rotating on Network Mobile with click to call feature and geo-targeted to: Skagit, Chelan, Yakima, Spokane, Whitman, Pend Oreille, and Benton counties March through November 2013

30,000 monthly video pre-roll impressions running on Google Display Network geo-targeted to Skagit, Chelan, Yakima, Spokane, Whitman, Pend Oreille, and Benton counties March through November 2013

100,000 monthly leaderboard and display ad impressions on kirotv.com across multiple counties

20,000 monthly in-video display ad impressions (:15 second E-Cycle ads) ran ROS (run of site) on KIRO-TV.com

In February through April of 2013 the WMMFA had multiple billboards placed along selected highway thoroughfares of medium sized counties within the state. Camera shots of the billboards are provided below. Placement was in the Tri-Cities (Benton, Franklin, Walla Walla counties) area and Yakima County for approximately 2 months per board.

- > The WMMFA owns the 15 and 30 second video productions and has made them freely available to our collectors, transporters, processors and interested parties for posting and /or advertising of the E-cycle plan along with their independent collection or processing web sites.
- > The WMMFA has always offered to participate with collectors that request cooperative advertising funds to produce local materials such as flyers, direct mail inserts, newspaper or event programs and other local published media. Participation amount varies based on total cost, pre-planned budget, and perceived effectiveness of the outreach.
- > The WMMFA maintains a website and toll free phone number that gives information about the WMMFA and the E-cycle WA plan in sufficient detail to all covered entities, potential service providers and other stakeholders. It is estimated that the WMMFA directed over 1,900 covered entities (mainly households, small governments and school districts) via phone contact in 2013.
- > Promotional materials are available by direct re-print from exportable files at our web site and as provided to Ecology for their website.
- > The WMMFA produces hundreds of laminated (outdoor) posters, banners (2013), and informative brochures annually available free of charge to collectors and interested parties for the asking. Samples of the posters, banners, and brochures reproduced below.

ecyclewashington.org

WHAT IS E-CYCLE WASHINGTON?

E-Cycle Washington is a program that provides responsible recycling of computers, monitors and TVs in our state. Starting January 2009, electronics manufacturers in Washington are taking responsibility for the cost of recycling these products. For consumers, small businesses, school districts, small governments, special purpose districts and charities, recycling is provided free of charge at authorized collection points.

E-Cycle Washington thanks electronics manufacturers for sponsoring this innovative program to responsibly and safely recycle electronics in our state.

The Washington Materials Management & Financing Authority (WMMFA) is the manufacturer-funded group leading this effort. WMMFA has contracted with collectors around the state, making e-cycling convenient and easy. You can also be assured that items taken to authorized collectors are handled safely and responsibly according to preferred management standards set by WMMFA and the State Department of Ecology.

- Laptops
- Computer Monitors
- Televisions

For larger quantities, call 1-866-779-6632.

Peripherals and accessories are NOT covered under the law:

- Mice
- Printers
- Copiers
- Scanners
- All other electrical devices, including appliances and cell phones

For recycling locations, please call
1-800-RECYCLE
or visit
www.ecyclewashington.org

WHY E-CYCLE?

Recycle: It is estimated that millions of pounds of unwanted electronics are thrown in the trash in Washington each year. Electronics can contain toxic materials such as lead, cadmium, mercury and hazardous chemicals that can harm human health and the environment. E-cycling keeps these and other materials out of our landfills and incinerators and conserves natural resources and energy required to make products from scratch.

Re-Use: Many materials in these products can be re-used in new products if handled properly, conserving the resources and energy needed to recycle and reprocess existing units as well as reducing the need to manufacture virgin parts. Some unwanted electronics still work, and can be made available secondhand to people and organizations who may not be able to afford to buy new equipment.

E-cycling helps us all take responsibility for the products we make, buy and use from the beginning to the end of their useful lives.

WHAT HAPPENS TO MY STUFF?

E-Cycle Washington processors are held to high standards and must comply with the State's "Preferred Processing Standards." For details, go to www.ecyclewashington.org. If the product you drop off still works, it may be reused through resale or donation.

DATA SECURITY
WMMFA is not responsible for the release of confidential data contained within collected electronic devices. Software programs are available to permanently destruct data. Simply formatting your drive or deleting files does NOT provide secure and complete data destruction. For more information on data security, go to www.ecyclewashington.org and click on Frequently Asked Questions.

FOR MORE INFORMATION
To find out more about E-Cycle Washington, data destruction, drop-off locations and how to dispose of items not covered by the program, please visit:
www.ecyclewashington.org

Suggested impact of cumulative E-Cycle outreach and promotion to date:

(target counties as referenced = counties traditionally at or below the state "average" per capita collection level)

2009	2010	2011	2012	2013 to date	
Increase public school awareness				(through July 2013)	
26,000 brochures and 500+ retail display posters issued					
Co-op print advertising bilingual Spanish and co-op as requested by collectors					
Multi-county press releases NPR(radio) WSJ (print) interviews released					
2,400 30 second radio announcements free electronics recycling					
Major retailers, including all Wal-marts identify E-cycle on sales receipts and apply E-cycle branding to new product packaging					
4000+ additional radio announcements - selected counties					
Major Billboard placement - Tacoma area					
100+ TV ads - Seattle area					
100+ TV ad placements Eastern WA area (Spokane area)					
Mobile device streaming and banner ads					
Major multiple billboard placements Tri Cities and Yakima					
Mobile device streaming, banner ads, video pre-roll Google display network

Preliminary 2014 Return Shares for Electronics Manufacturers
Washington State Electronic Products Recycling Program 1/15/2015

The E-Cycle Washington program conducted 41 sampling events in 2014 gathering data on 15,675 TVs, monitors and computers. That data was used to determine return share by manufacturer, summarized below.

<u>Manufacturer Name</u>	<u>Weight (lbs)</u>	<u>Identified Brands Return Share (%)</u>	<u>Proportional Orphan* Share (%)</u>	<u>Total Return Share (%)</u>
Sony Electronics, Inc.	76730	11.90	0.79	12.69
Panasonic Corporation of North America	55056	8.54	0.57	9.11

*Orphans are brands for which an owner could not be identified or brands that were manufactured by companies that have gone out of business and there are no successors in interest. The responsibility for managing orphan products is distributed among all identified manufacturers proportionally.

Materials of Concern Export information

The preferred environmental standards that all processors contracted with the WMMFA must subscribe to require that any materials of concern (materials that present potential risk to humans or the environment) exported to a NON OECD (Organization for Economic Co-operation and Development) member country have approval from the destination country and confirmation from the US Environmental Protection Agency.

Total weight of all materials of concern, including unwanted electronic products, electronic components, and electronics scrap collected by the WMMFA that have been exported from Washington state, from processors used by the WMMFA, to countries that are not members of the Organization for Economic Co-operation and Development or the European Union = 0. This information is provided to the WMMFA by each processor and confirmed via annual audits. Destination countries for "materials of concern" and non- materials of concern (commodities) can be found in section 5.c.d. of this report

List of CEP Manufacturers participating in the Standard Plan 2014*

* Note: Not all manufacturers listed actually receive an invoice for sharing of WMMFA expenses. Actual invoices (plan share of expenses) are based on the "market" and "return" shares of each listed manufacturer.

Documentation of work done with direct processors used by the Standard Plan to promote and encourage the design for recycling of new products (CEP's) destined for end of life recycling under this program

In the 2009 Annual Report to Ecology the WMMFA outlined a plan describing collaboration with the NCER and the Green Electronics Council to pursue grant funding for a "Close the Loop" registry with the goal being creation of a one stop clearinghouse that would contain a database accessible by manufacturers and processors that would contain specific de-manufacturing hints covering components and contents of the electronic products they receive. This effort was not successful and no grant funds were received. However, based on sampling results of CEP weights for the invoicing period 2009 - 2014 the average weights of CEP's have trended downward considerably (see chart below). Many WMMFA member manufacturers are involved in Dfe and Dfr efforts nationally or globally as the majority of the weight of CEP's covered by the Standard Plan are from manufacturers that also sell worldwide. Approximately 85% of the electronic products collected by the WMMFA now (covered devices) are no longer being manufactured for sale in the US. The chart provided below illustrates the progress in reducing the overall weight of CEP's currently being produced and sold in Washington and is similar in trend to national results.

Average net weights (excludes packaging) by CEP used to convert NPD and IDC unit sales to pounds

CEP Type	2009	2010	2011	2012	2013	2014	2015	weight variance % '09 to '15 - where applicable

PROCESSING COSTS - DFR —2014

Each of the processors used by the Standard Plan must comply with the "preferred processing standards" as defined in the "Environmentally Sound Management and Performance Standards for Direct Processors." An early survey sent out in 2009 to the Washington state processors used by the Authority revealed these recommendations, in order of perceived impact and importance, pertaining to reducing the overall cost to manufacturers for processing, and for the recycling or diversion of a higher percentage of materials of concern.

1. Flat Panels will become a larger percentage of material to be recycled in the future due to the current proliferation of LCD and plasma TV's and LCD monitors being sold now. Processors need an outlet for CRT Glass and LCD screens in order to reduce processing costs to manufacturers.
2. Eliminate multi laminated materials and allow for easy separation of plastics from metals from lamps from glass so that the materials separation cost does not exceed the compensation from recycling the material. Assist in providing buy back opportunities for recovered plastics and other reusable items.
3. New technologies in manufacture of CEP's should allow for more automated dismantling using snap out fittings that may be accommodated by automated processes for dismantling. Identify components containing hazardous materials for easier and more efficient and complete removal and recycling.
4. Removing or reducing lead from glass and circuit boards would reduce downstream processing costs. Reduce or eliminate beryllium, cadmium, mercury and lithium (batteries).

These recommendations, as provided by the participating Washington State Standard Plan processors, are not a new revelation to manufacturers. They are shared with all participating manufacturers as collective information that summarizes some of the obstacles to lowering our (WMMFA) collective processing costs.

Re-use information -2014

*Based on feedback from our network of collectors typically involved in refurbishment and/or resale of used electronics and from annual reports obtained from Ecology from our non-profit collectors we know that the ratio of reused to recycled products varies considerably by type of collector, and, type of product. Many of our non-profit collectors focus on refurbishing and reuse operations with recycling as the secondary option. Since the E-Cycle Washington program was designed primarily as an end of life program for unwanted electronics many of our collectors focus on getting CEP's to the program for responsible recycling of contents due to the low sales value of refurbished equipment in relation to the sales price of new equipment available at retail. For 2014 we estimate that a weight equivalent to approximately **580,000 pounds of COMPUTERS** (laptops and towers) were put into reuse by our collectors. We estimate that approximately **220,000 pounds of CRT TELEVISIONS** were put to reuse. Of **FLAT PANEL TELEVISIONS** (plasma, LCD, and LED) we estimate that about **134,000 pounds** were sent to reuse by collectors. **CRT MONITOR** reuse has declined considerably over time with approximately **50,000 pounds sent to reuse**. Approximately **60,000 pounds of FLAT SCREEN (LCD) MONITORS** were sent to reuse via resale at the collector level. These pounds are NOT included in our collected pounds reports as they are sent to re-use directly by the collectors and therefore not "processed" within the E-Cycle program. Including the 49,215 pounds of reuse reported by our processors **approximately 1,093,215 pounds of CEP materials, in total**, were sent to refurbishment and/or reuse. Therefore, approximately 4.5% of the re-use volume is managed at the processor level with 95.5% occurring at the collector level.

* **NOTE: Pounds estimates are based on objective and subjective data received from collectors. Some collectors extrapolate re-use data based on historical relationships between sales and recycled pounds.**

WMMFA Annual Program Revenue and Expenses - 2014

Figures based on "cost" basis: I.E.: Revenue recorded as received and expenses recorded when paid

Audited financial statements for publication in the WMMFA annual report on an accrual basis will be available mid 2015 (for calendar year 2014 statements)

Program net CEP pounds collected and processed 2014 ----->

44,361,732

Total REVENUE from manufacturer payments to plan - including reserve carry forward from 2013

\$12,275,507

100%

OPERATIONAL Expenses

Total COLLECTION EXPENSES - payments to registered collectors and for CEP materials from "covered" events	\$4,367,655	36.8%
Total TRANSPORTATION EXPENSES - purchased from registered transporters and paid to collectors that transport	\$1,698,687	14.3%
Total NET PROCESSING EXPENSES - payments to registered processors	\$5,271,479	44.4%
Total RETURN SHARE SAMPLING - payments to registered sampling agencies + sampling supplies	\$98,990	0.8%
Public OUTREACH including advertising, educational and promotional efforts	\$31,604	0.3%

TOTAL OPERATIONAL DIRECT and SERVICE PROVIDER EXPENSES

\$11,468,415 96.7%

ADMINISTRATIVE Expenses

Salaries and wages, including payroll taxes	\$314,989	2.65%
Professional services: legal and accounting	\$33,937	0.29%
Market share research - purchased data	\$11,747	0.10%
Rent expense	\$6,000	0.05%
Travel expenses - board and employees	\$5,636	0.05%
Office supplies	\$5,449	0.046%
Insurance expense	\$5,198	0.04%
Telephone and internet expenses	\$4,185	0.035%
Meetings and seminars	\$3,417	0.029%
Postage and delivery	\$1,709	0.014%
Office hardware and IT equipment including security system	\$1,538	0.013%
Utilities	\$1,248	0.011%
Bank service charges	\$977	0.008%
Miscellaneous	\$846	0.007%

TOTAL ADMINISTRATIVE EXPENSES

\$396,876 3.3%

Total Administrative and Operational EXPENSES

\$11,865,291

100.0%

***NET Reserves to carry forward to 2015 and/or available as credit to manufacturers on future invoices**

\$410,216
