

List of State Environmental Review Process (SERP) determinations

Ecology has issued a SERP determination for the following agreements. The determination addresses the status of cultural resource review, and may include other conditions necessary for the agreement to successfully move forward. If you are applying for further funding from the Clean Water State Revolving Fund, and you have a SERP Determination from a previous phase for the same project, contact Liz Ellis, Environmental Review Coordinator to see if re-affirmation is a possibility. If you have concerns or comments about a SERP Determination, feel free to contact Financial Management Section Supervisor Jeff Nejedly at 360-407-6572 or Liz Ellis at 360-628-4410.
