This chapter delimits the streams and rivers and portions thereof that constitute shorelines of the state pursuant to RCW 90.58.030 (2)(d) and (e).

[Order DE 72-13, § 173-18-010, filed 6/30/72.]

WAC 173-18-020 Applicability.

WAC 173-18-040 Streams and rivers.

The following provisions of this chapter delimit the streams and rivers that constitute shorelines of the state as follows:

(1) Streams that constitute shorelines.

(a) Western Washington. Streams in Western Washington from the point at which the stream reaches a mean annual flow of twenty cubic feet per second down to the mouth of said stream or river: Provided, that the stream falls at said point, within the jurisdiction of chapter 90.58 RCW.

(b) Eastern Washington. Streams in Eastern Washington from the point at which the stream reaches a mean annual flow of twenty cubic feet per second down to the mouth of said stream or river: Provided, that the stream falls at said point, within the jurisdiction of chapter 90.58 RCW.

(2) Rivers that constitute shorelines of statewide significance.

(a) Western Washington. Any rivers west of the crest of the Cascade range downstream of a point where the mean annual flow is measured at one thousand cubic feet per second or more. Provided, that the river falls at said point within the jurisdiction of chapter 90.58 RCW.

(b) Eastern Washington. Either of the following points on rivers in Eastern Washington, whichever is farther upstream;

- (i) The point at that the mean annual flow exceeds two hundred cubic feet per second; or
- (ii) The lowest extremity of the first three hundred square miles of drainage area east of the crest of the Cascade Range; provided that either of said points that is utilized is within the jurisdiction of chapter 90.58 RCW.

(3) Until superseded as provided in WAC 173-18-044, rivers constituting shorelines of the state are listed in WAC 173-18-050 through 173-18-430. Other data related to these lists.

(b) The following provisions set forth the name of the quadrangle maps where the stream or river is shown. The quadrangle in which the shoreline delimitation begins and the first quadrangle downstream from the county line is underlined. The quadrangle in which the shoreline of statewide significance begins is followed by an asterisk. The size, in minutes, of all quadrangle maps is designated.

(c) Where quadrangle maps are unavailable, photomaps have been used as indicated.

WAC 173-18-044 Review and update of designations.

Each local government master program shall include a list of streams and rivers constituting shorelines of the state within the jurisdiction of the master program that complies with the requirements of RCW 90.58.030(2). When such master program is approved by the department, subsequent to the effective date of this provision, the list within the master program shall be the official list for that jurisdiction and shall supersede the list contained herein.

RCW 90.58.020 provides that shorelines of the state may change overtime based on authorized or permitted alterations and changes resulting from natural processes,

Alterations of the natural condition of the shorelines and shorelands of the state shall be recognized by the department. Shorelines and shorelands of the state shall be appropriately classified and these classifications shall be revised when circumstances warrant regardless of whether the change in circumstances occurs through man-made causes or natural causes. Any areas resulting from alterations of the natural condition of the shorelines and shorelands of the state no longer meeting the definition of "shorelines of the state" shall not be subject to the provisions of chapter [90.58](#) RCW.

Therefore, each local government shall review the list contained within its master program as part of each subsequent master program periodic review to ensure that the list remains current and accurate over time. This review and subsequent confirmation of streams and rivers and streams and rivers of statewide significance shall be submitted to Ecology along with updated geospatial mapping information for integration into the department's public facing shoreline mapping resources.
