**Purpose of the proposal and its anticipated effects, including any changes in existing rules:** Ecology is proposing amendments to our Clean Vehicles Program Rules (Chapter 173-423 WAC) to incorporate changes to the Advanced Clean Trucks and Heavy-Duty Low NOx Omnibus regulations adopted by the California Air Resources Board (CARB). These regulations are an essential policy tool for addressing climate change and improving air quality in Washington.

These proposed amendments respond to industry concerns by easing compliance requirements for the heaviest vehicles. They also streamline implementation and maintain consistency with state and federal laws. The Advanced Clean Trucks program applies to medium- and heavy-duty engine and vehicle manufacturers. It requires manufacturers to gradually sell more new zero-emission models in Washington through model year 2035, and provides flexibility by allowing manufacturers to purchase credits from other manufacturers to meet this requirement and choose which models to transition to zero-emissions technology. The Heavy-Duty Low NOx Omnibus regulation applies to heavy-duty internal combustion engine

manufacturers and requires them to meet more protective air quality standards, particularly on oxides of nitrogen and particulate matter, starting in model year 2026.						
<b>Reasons supporting proposal:</b> As directed by RCW 70A.30.010, the Department of Ecology shall adopt rules to implement the motor vehicle emission standards of the state of California, including the zero emission vehicle program, and shall amend the rules from time to time, to maintain consistency with the California motor vehicle emission standards.						
Statutory author	ity for adoption: Chapt	er 70A.30 RCW, Motor Vehicle Emission Standa	ards

☑ No: Please explain: RCW 34.05.328 (5)(b)(v) exempts rules from a cost-benefit analysis when the content is explicitly and specifically dictated by statute. RCW 70A.30.010 directs Ecology to adopt rules to implement the motor vehicle emission standards of the state of California, including the zero emission vehicle program. The law also directs Ecology to amend its rules to maintain consistency with California's rules and 42 U.S.C. Section 7507 (Section 177 of the Clean Air Act). 42 U.S.C. Section 7507 allows a state to adopt and enforce vehicle emission standards if they are identical to California's standards.						
Regulatory Fairness Act and Small Business Economic Impact Statement  Note: The Governor's Office for Regulatory Innovation and Assistance (ORIA) provides support in completing this part.
